Smnps freight wagons

The Smnps wagons are flat with fixed stanchions and they are not equipped with side walls. They were designed to carry long steel products such as pipes or rebar.

Those wagons operated by On Rail GmbH (NL-ORME) and European Rail Rent GmbH (D-ERR and NL-ER) were manufactured by TRANSWAGON AD in Burgas, Bulgaria. Very similar rolling stock is operated by Ermewa (F-ERSA) but these cars were manufactured by INVEHO UFO in Orval, France. While there are small differences, they all share the same overall design.

With all the bright colours used to decorate these wagons, they are familiar to most European railway enthusiasts. They operate on all major European railways routes. The total number produced is over 1200 pcs.

As usual we tried to stick to the details as much as the technology allows us. To avoid any embarrassing compromises we accounted for all 8 versions of the wagon including the special one equipped with a steel cage to carry copper billets. The models feature a die cast chassis and are assembled of 105-128 parts, depending on the version. All models are delivered with cargo to provide a realistic experience.

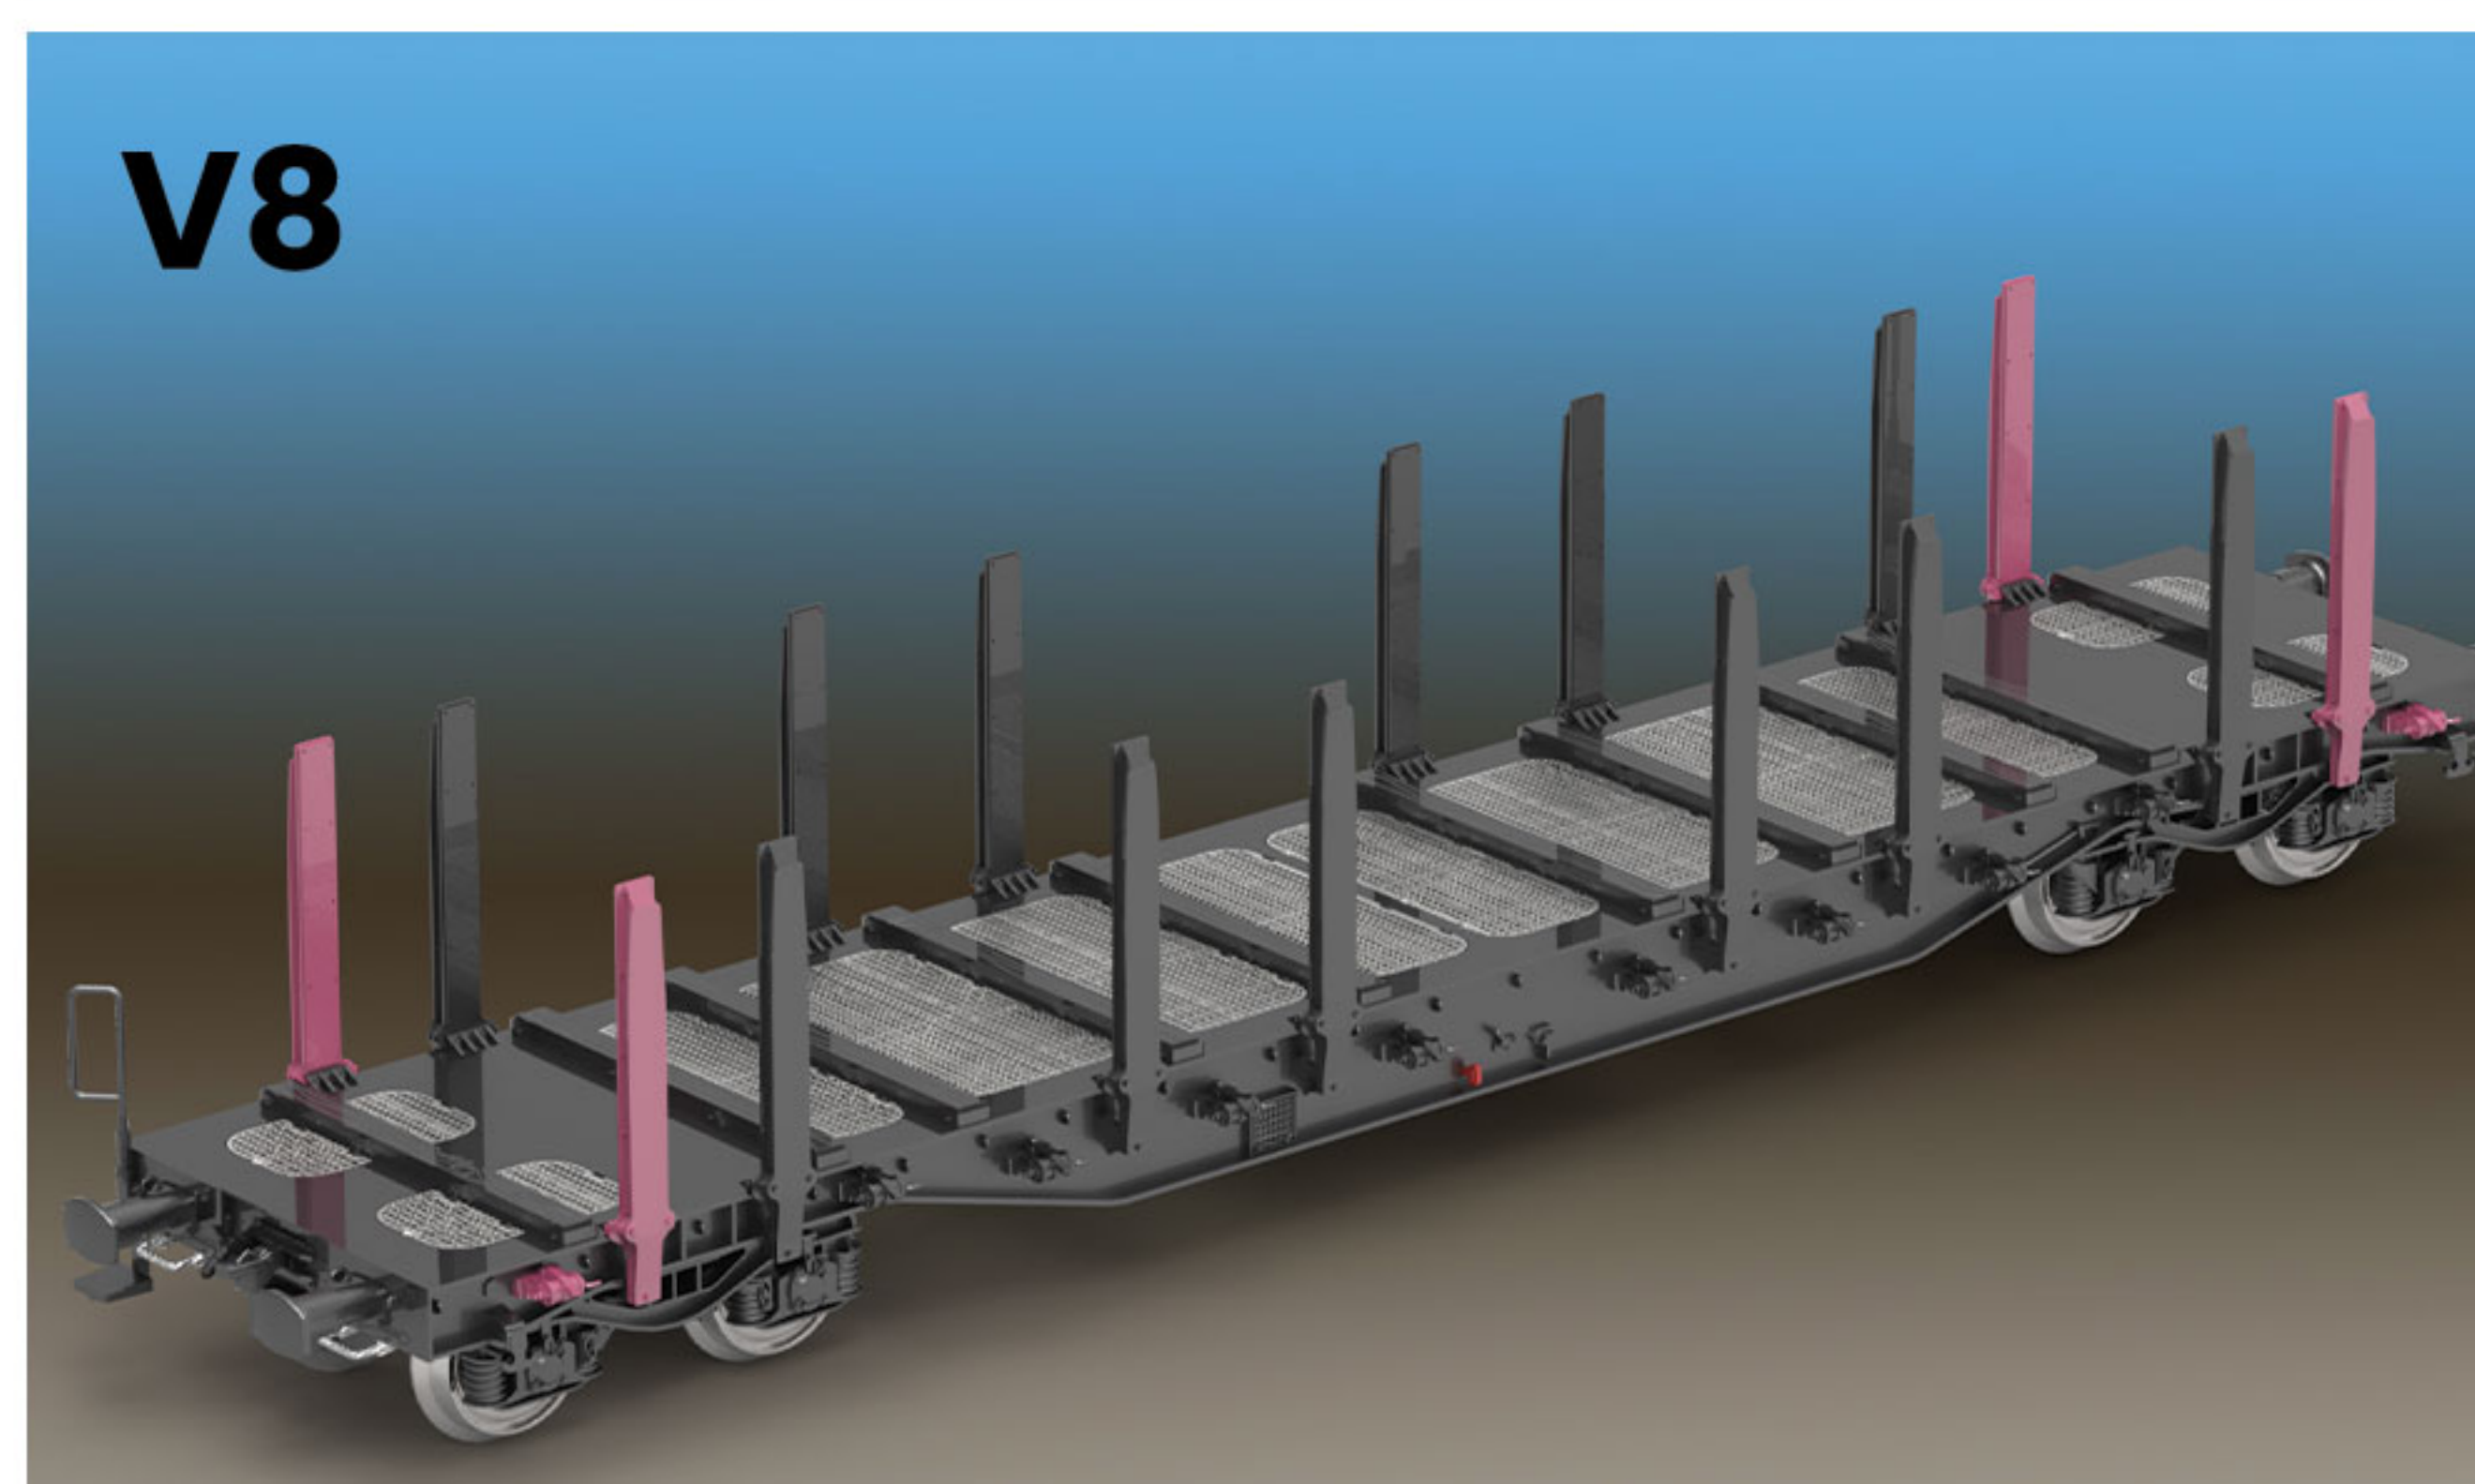

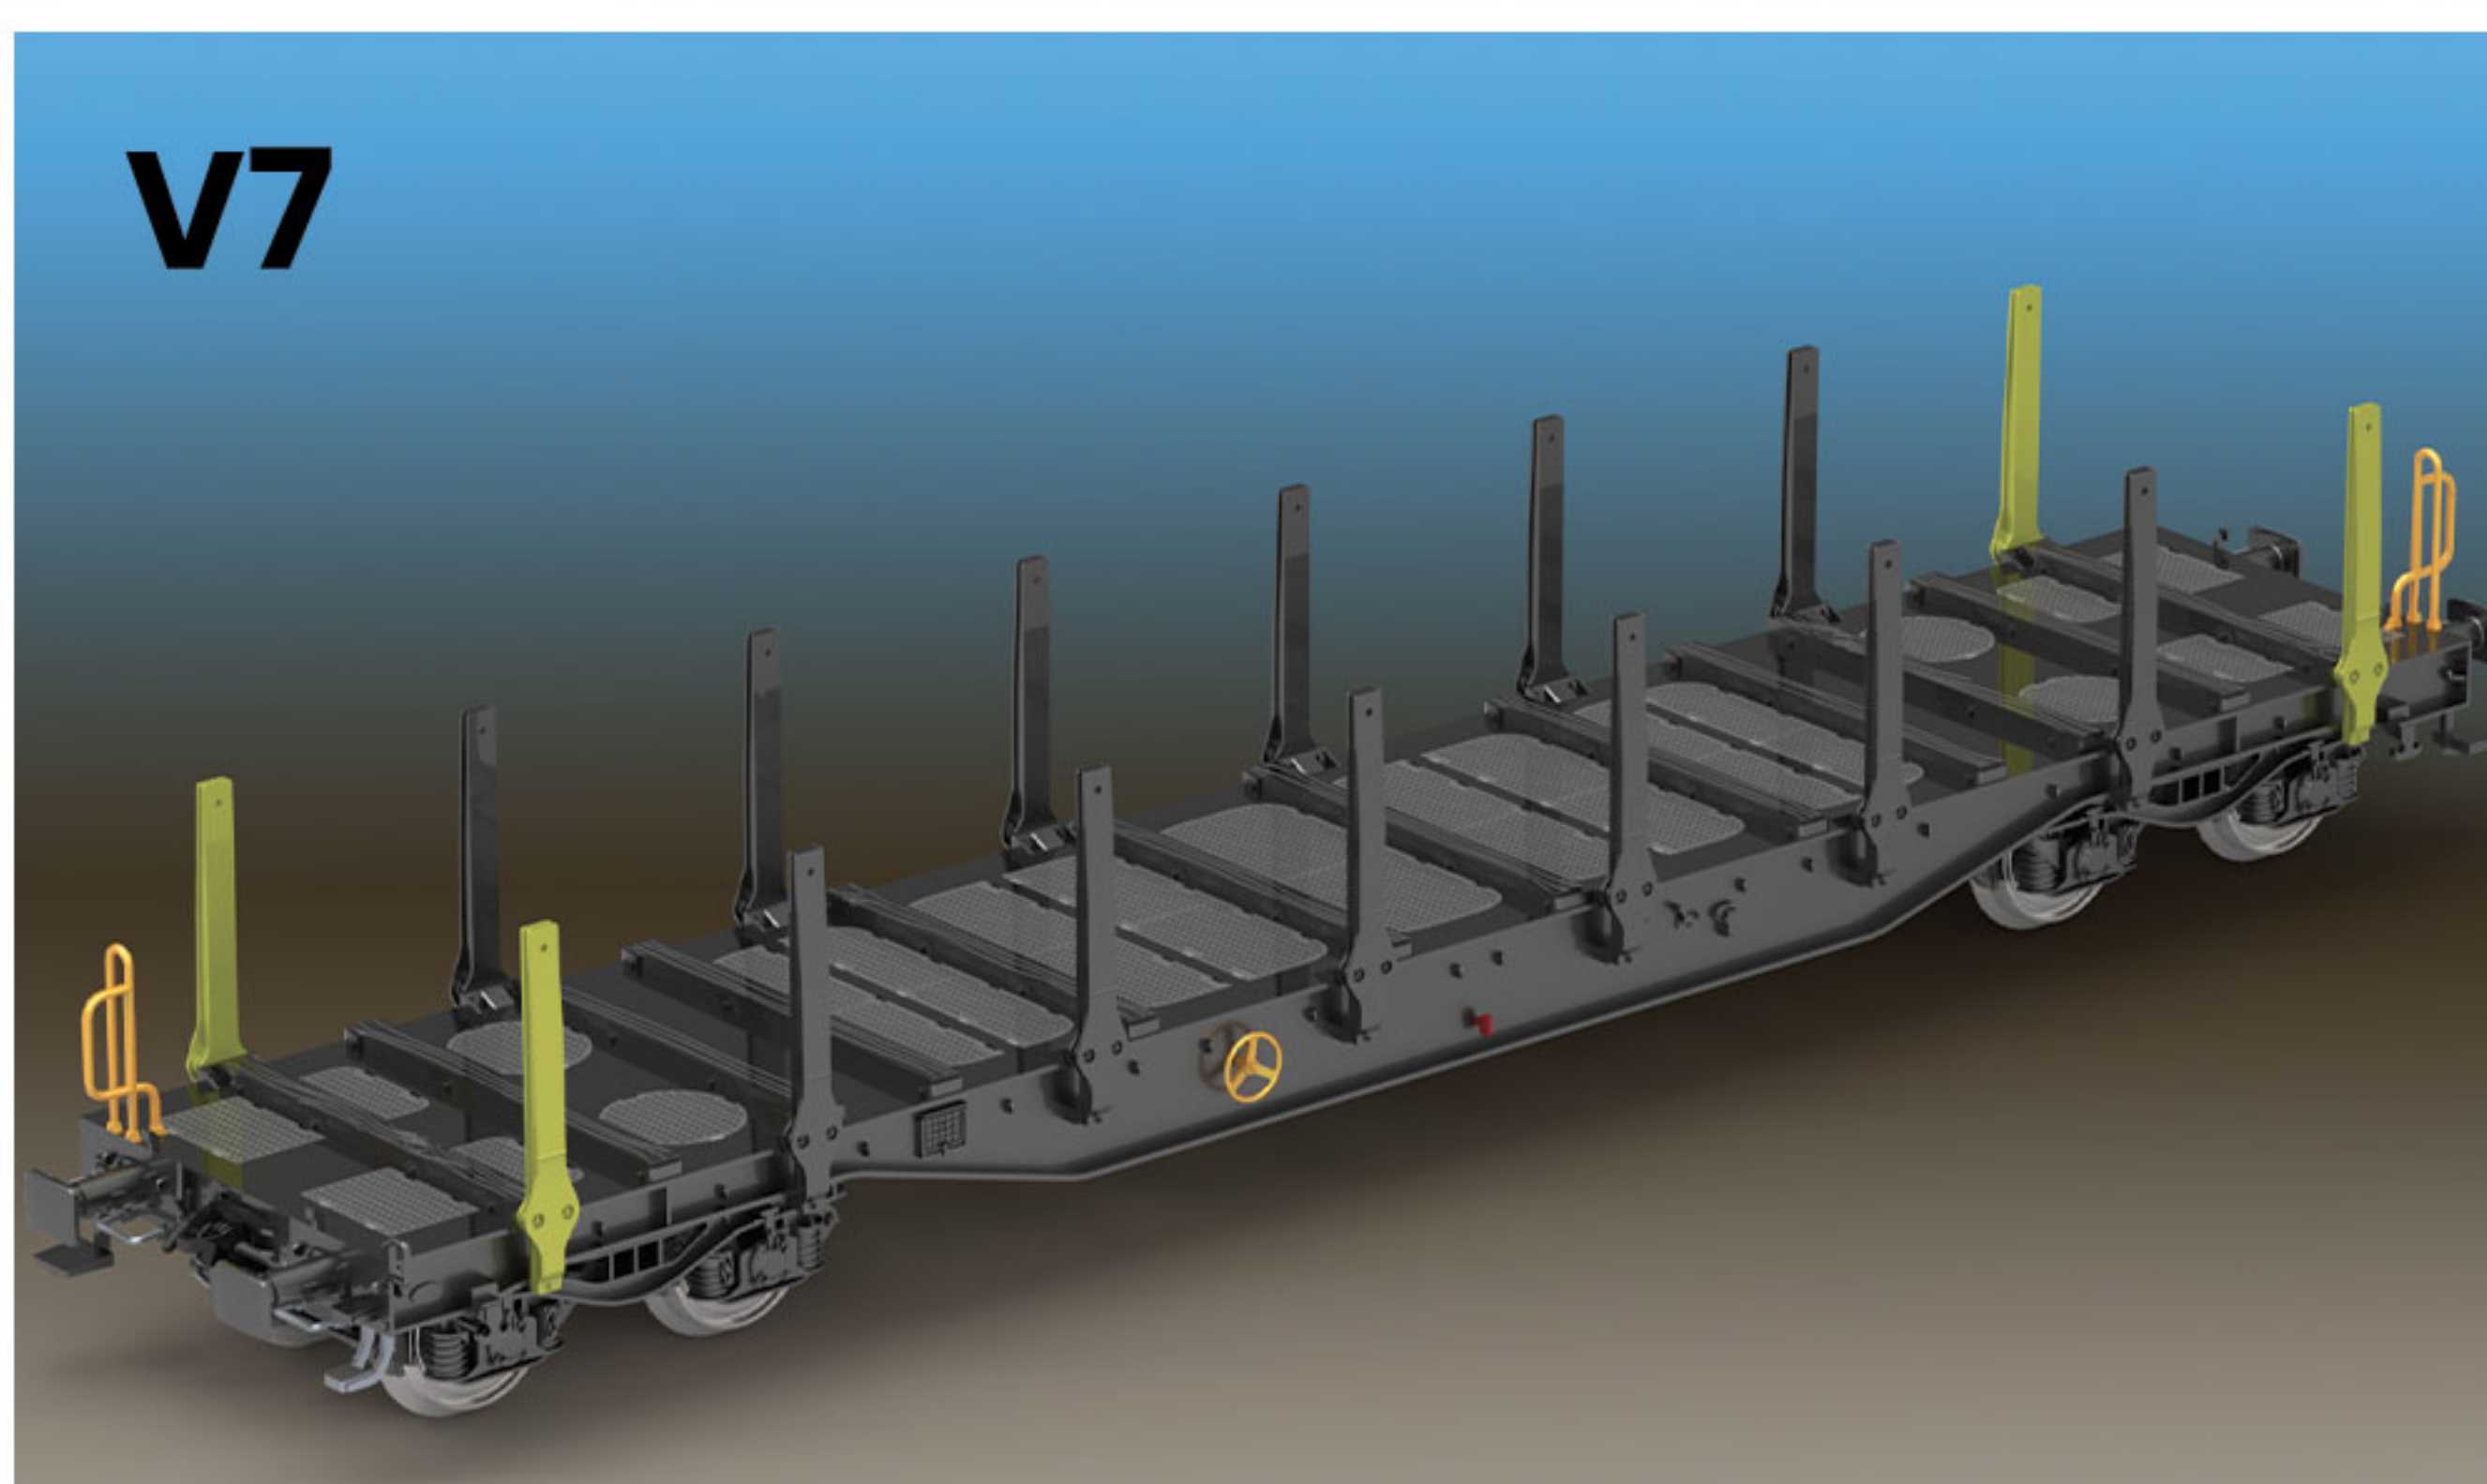

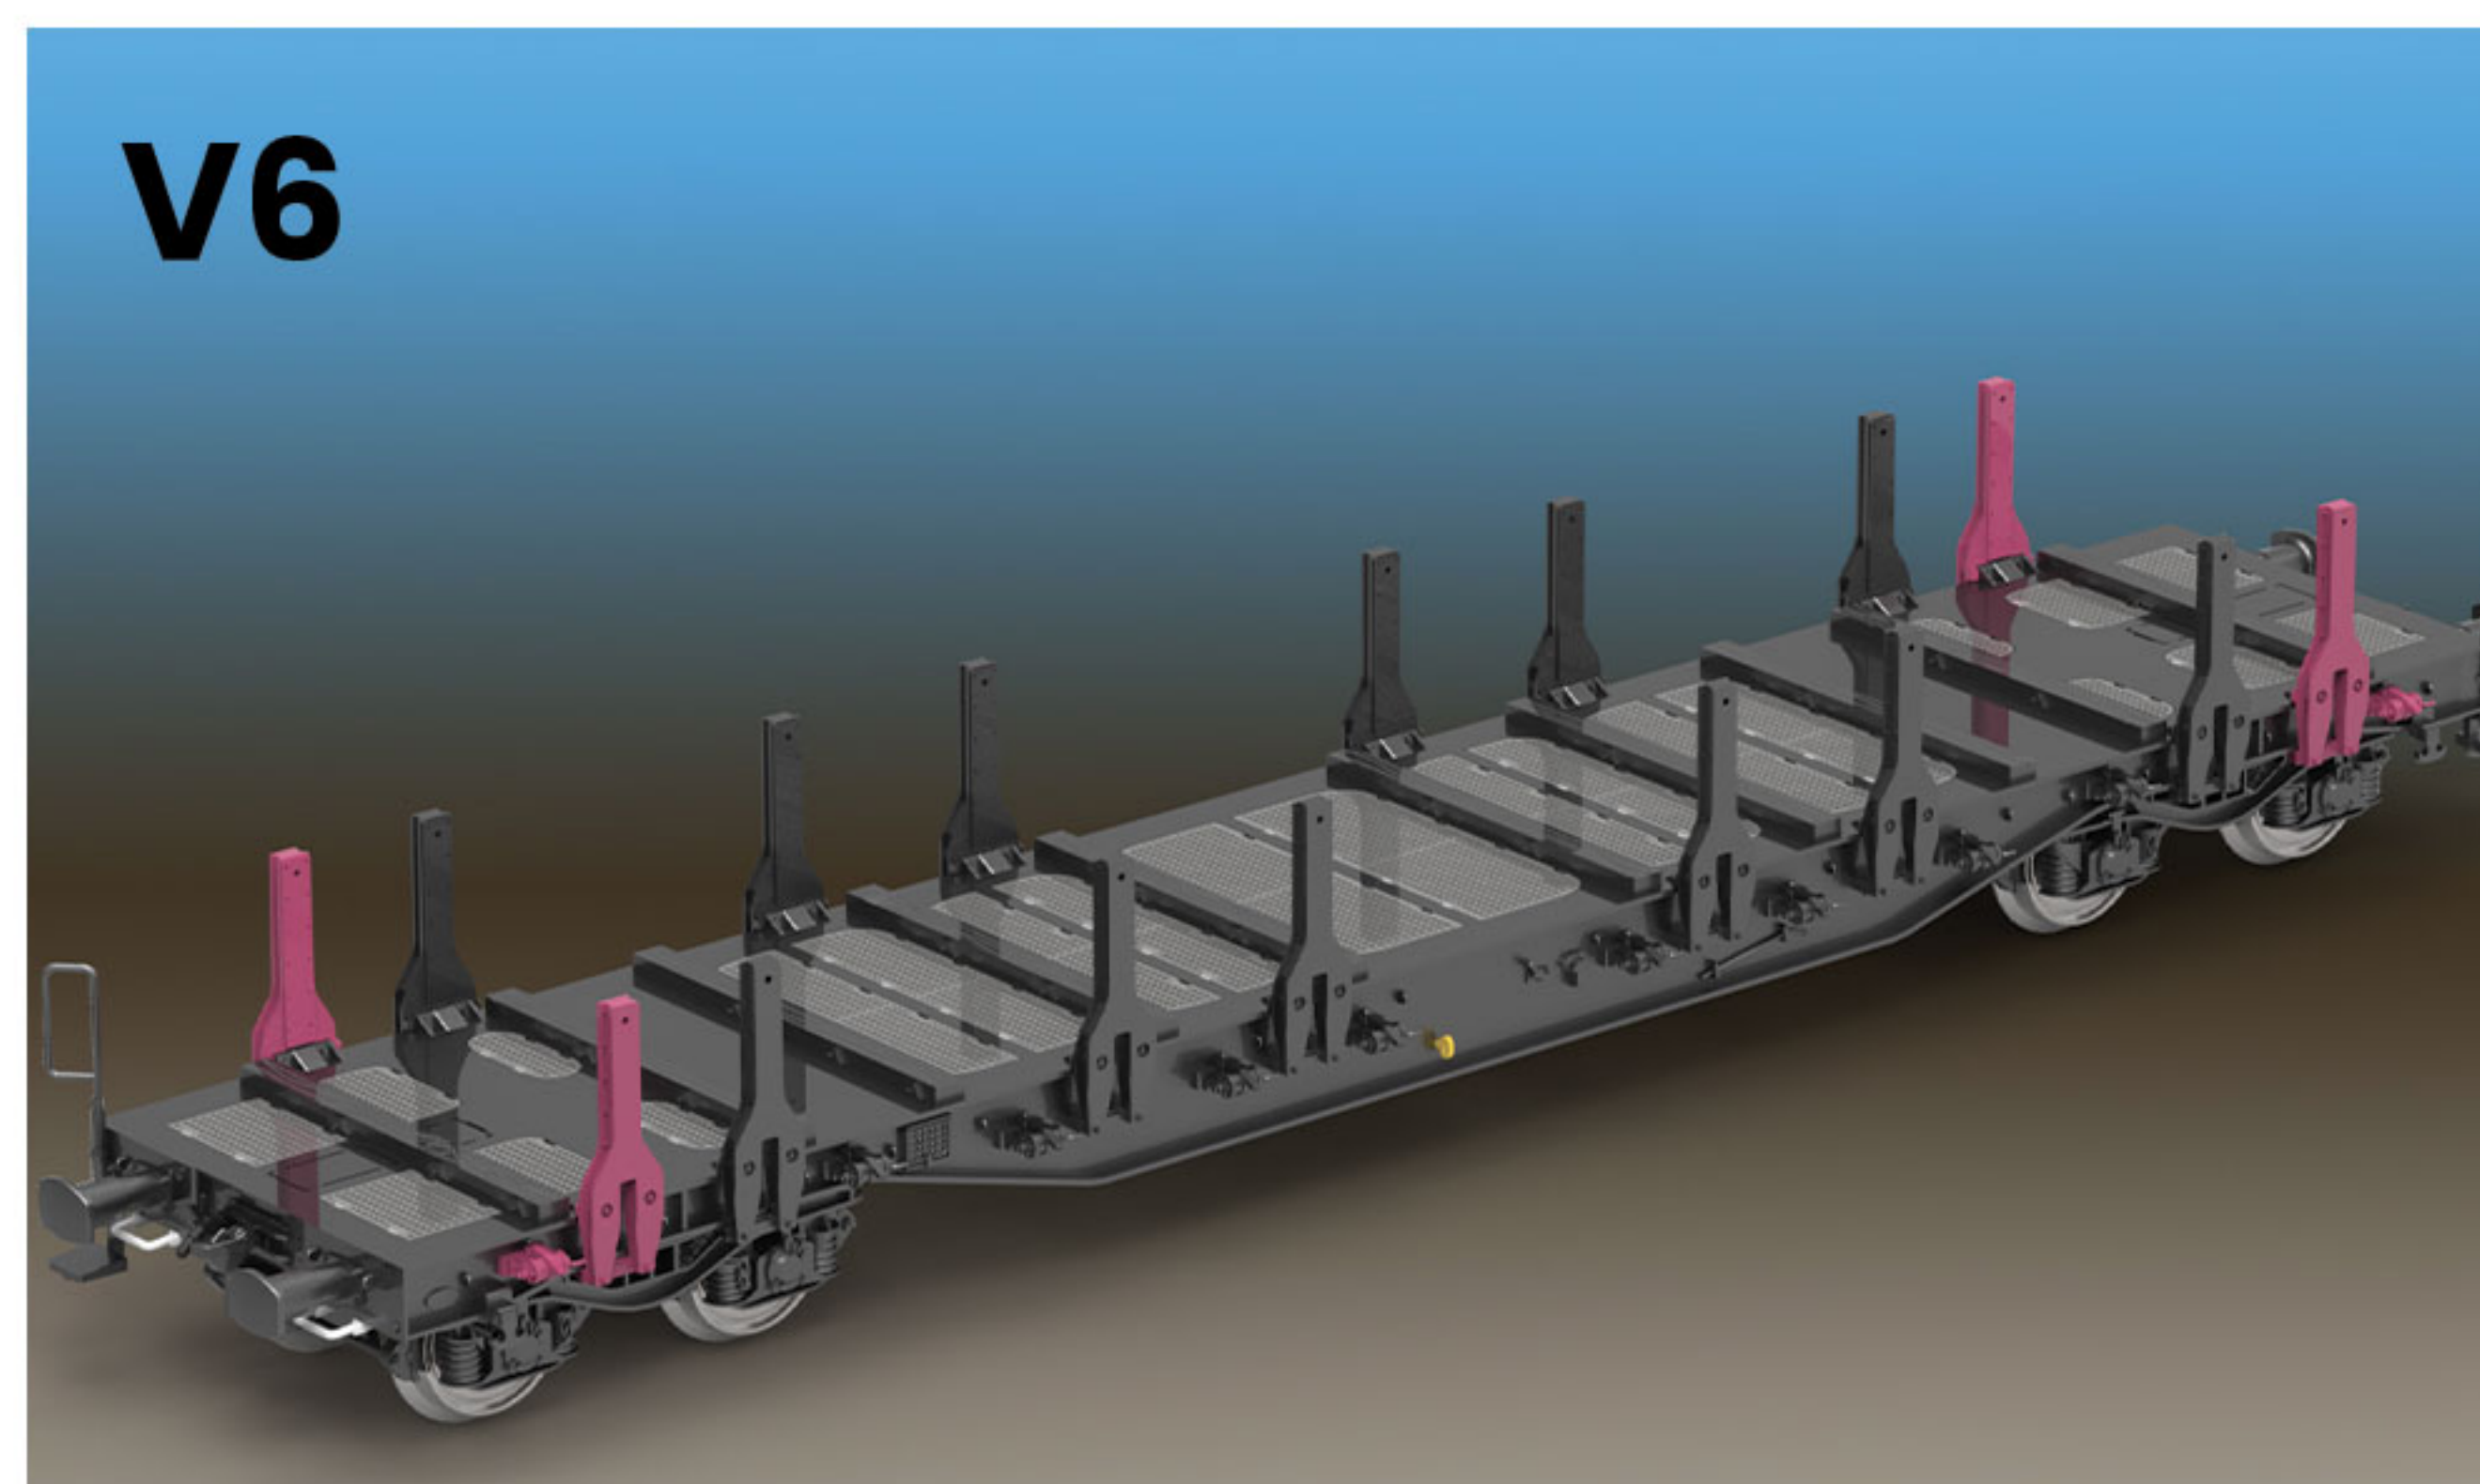

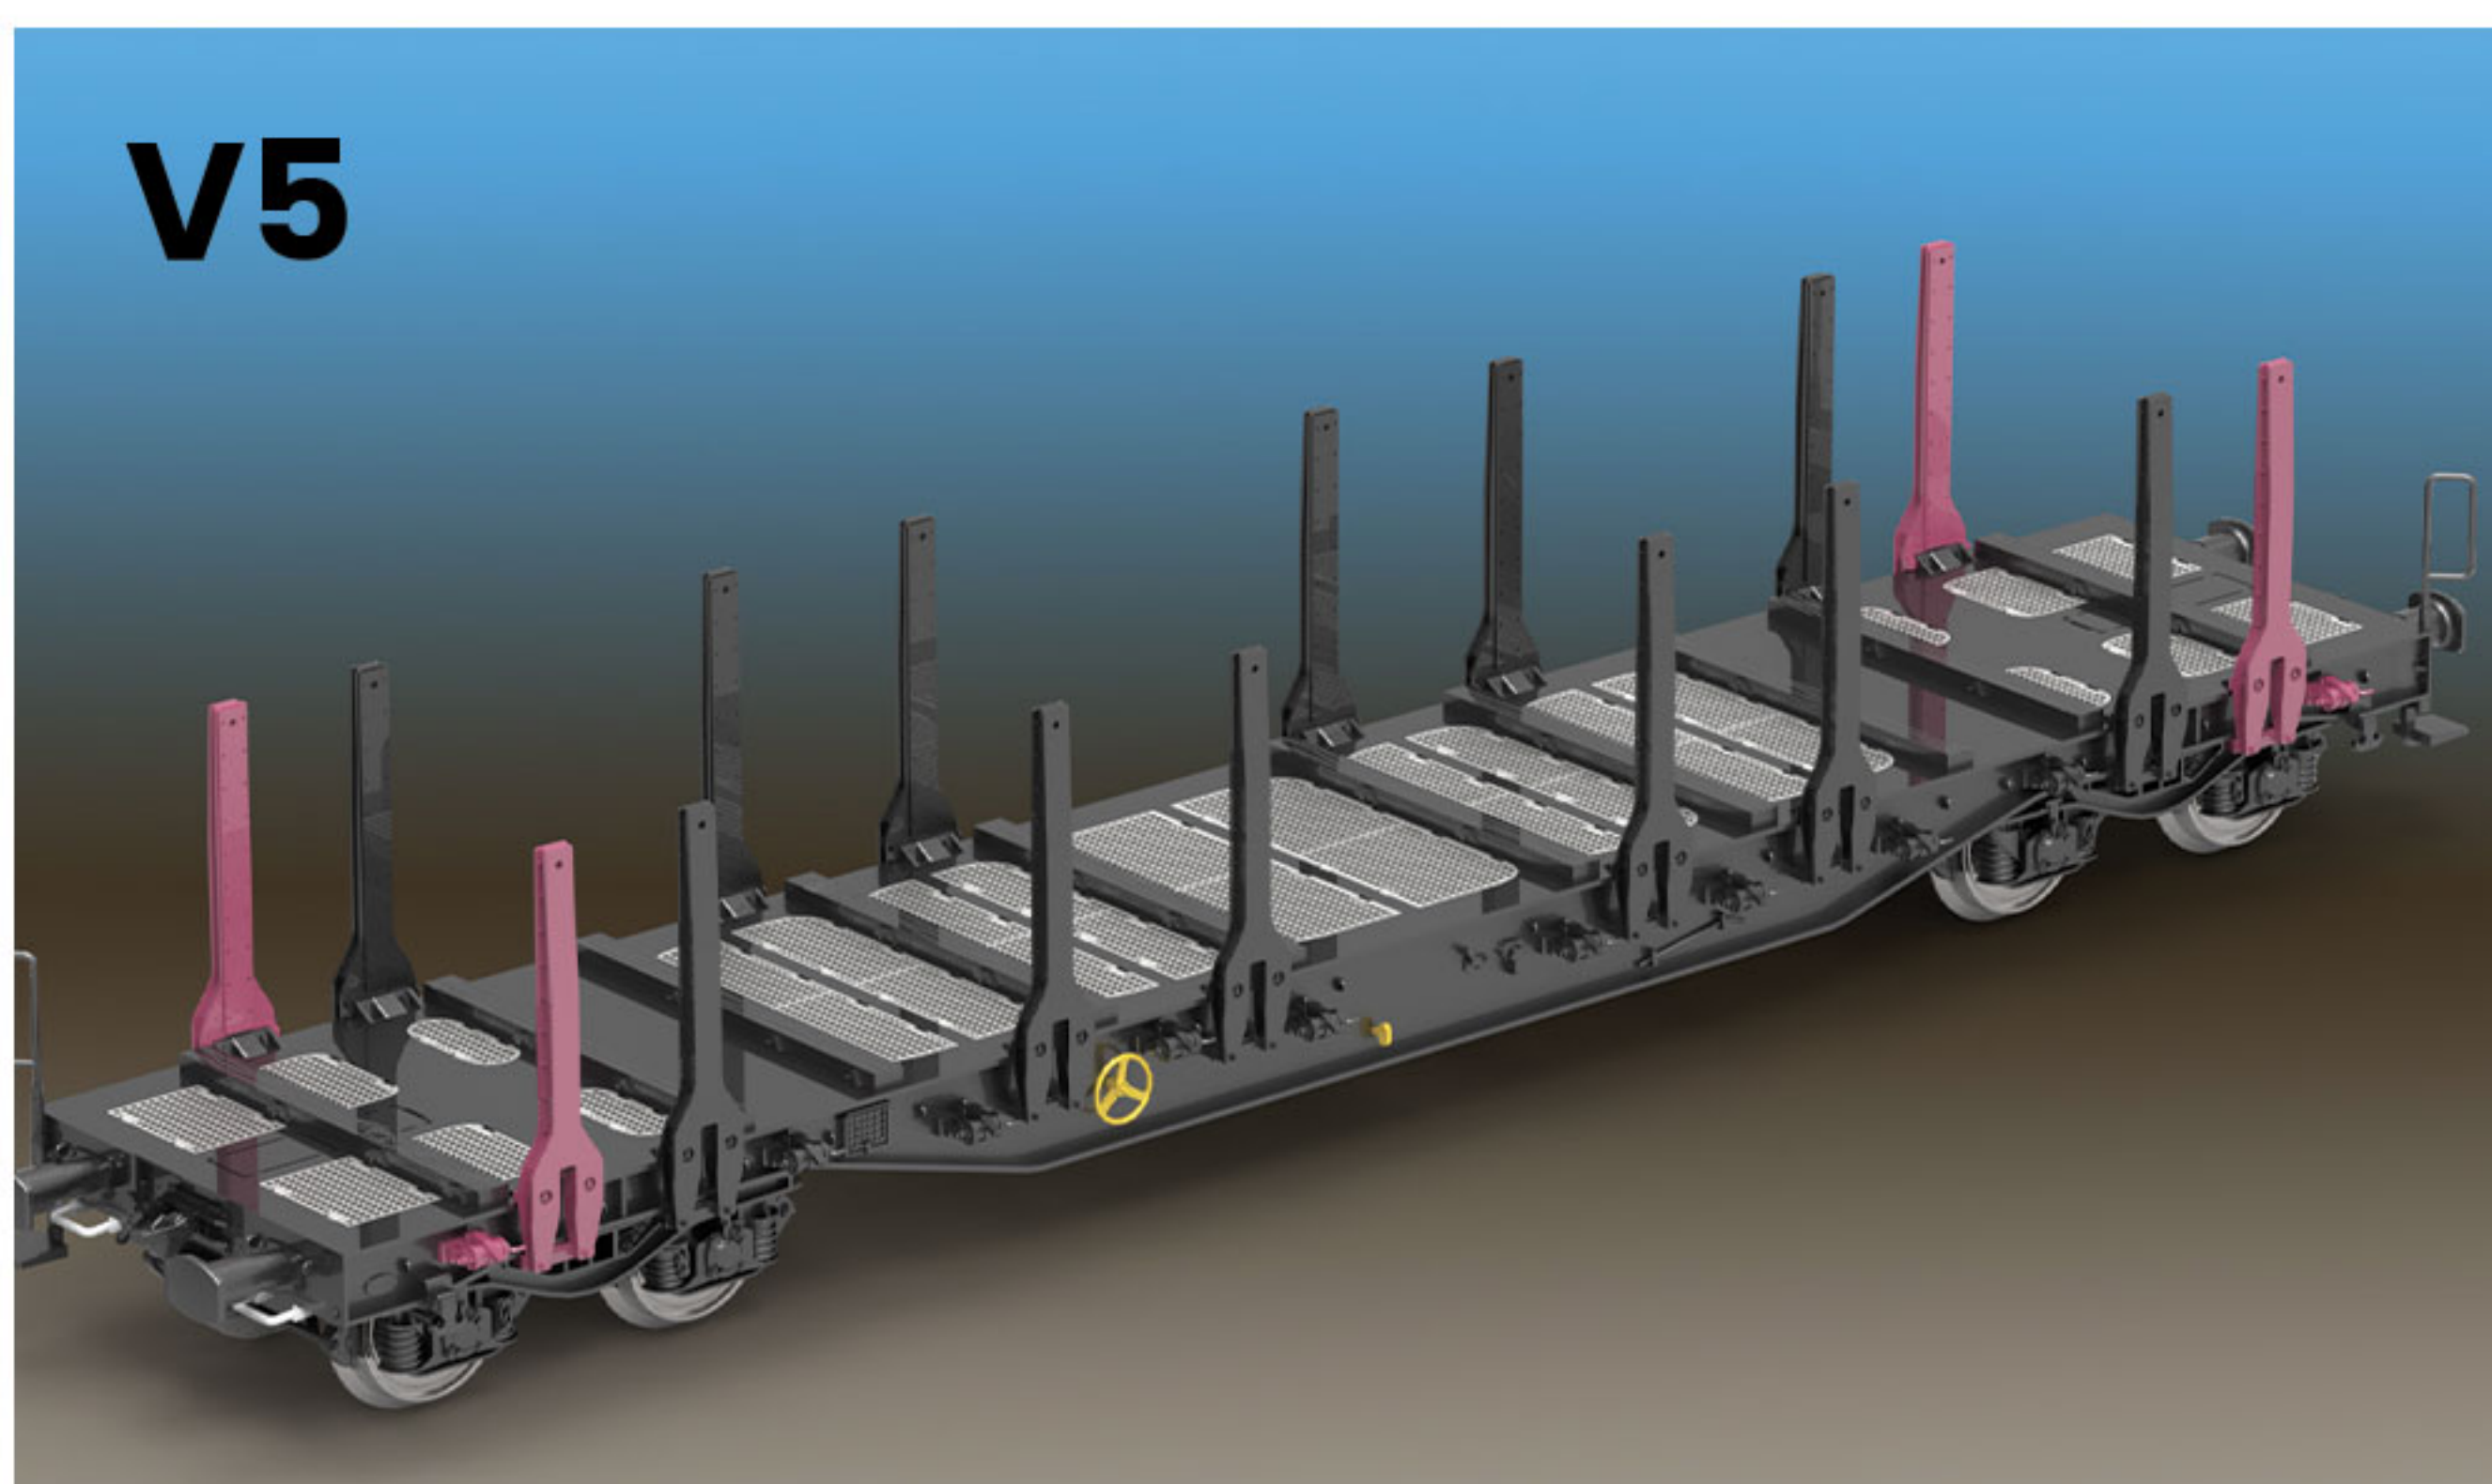

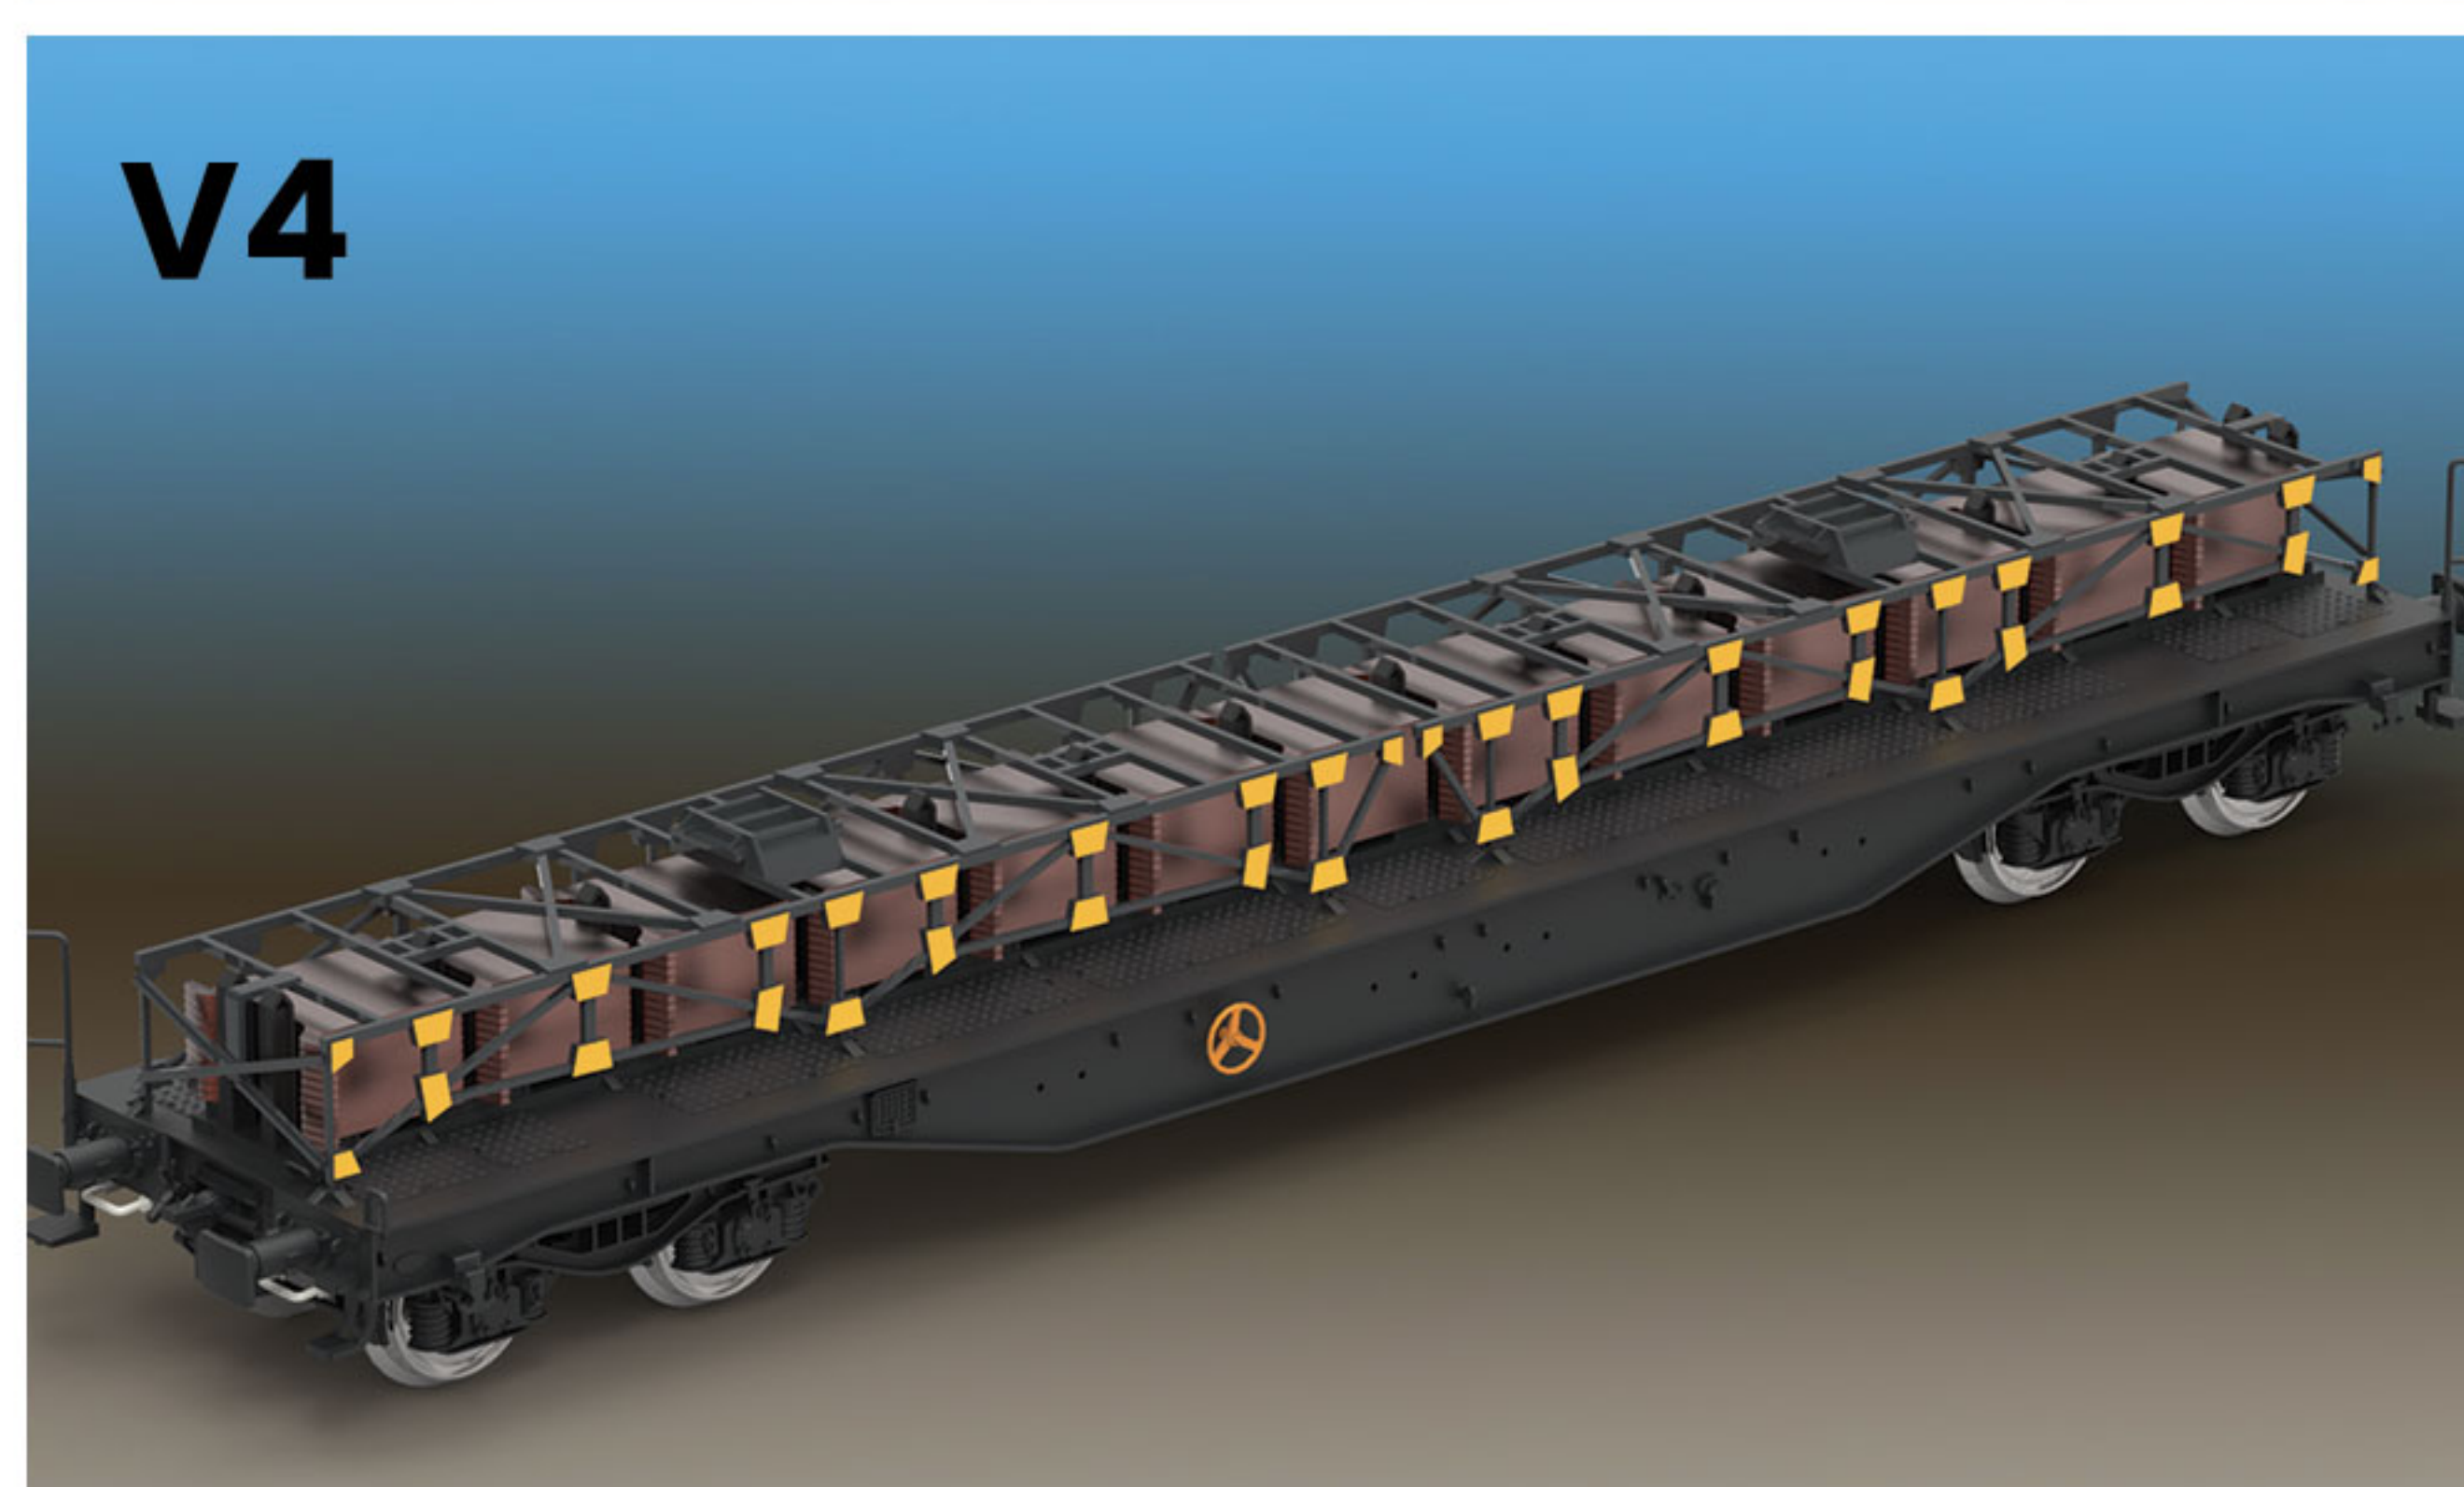

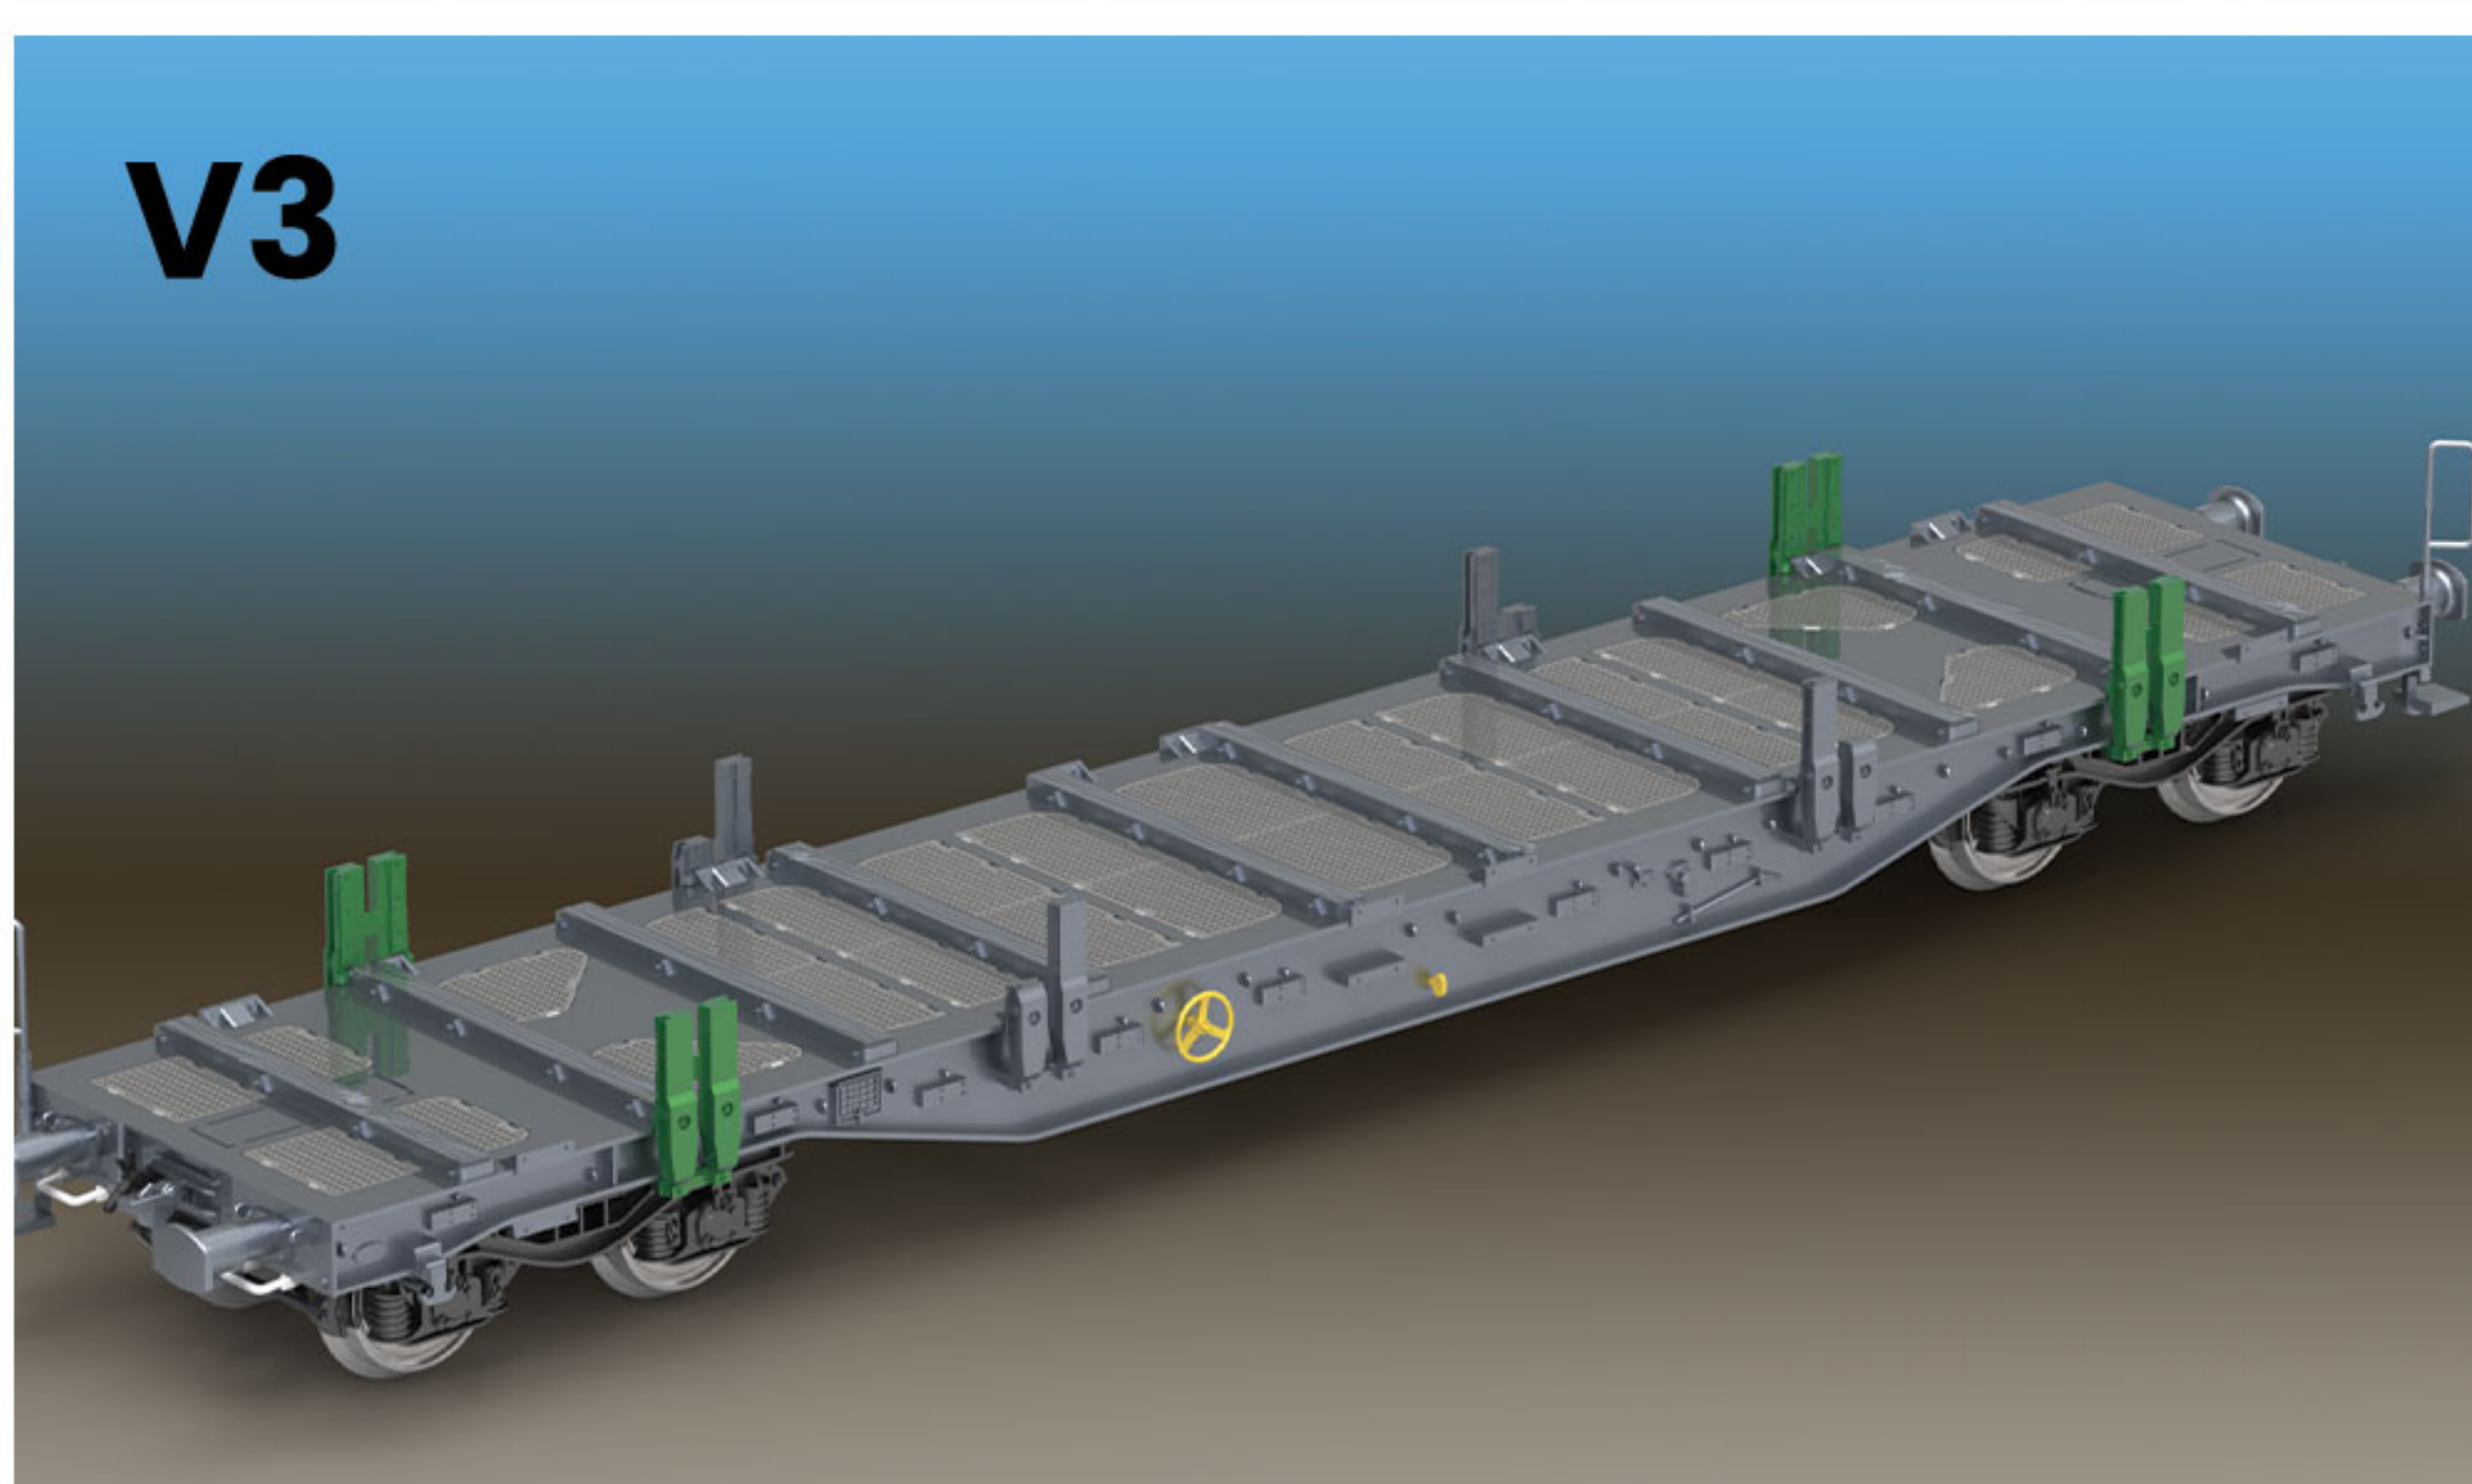

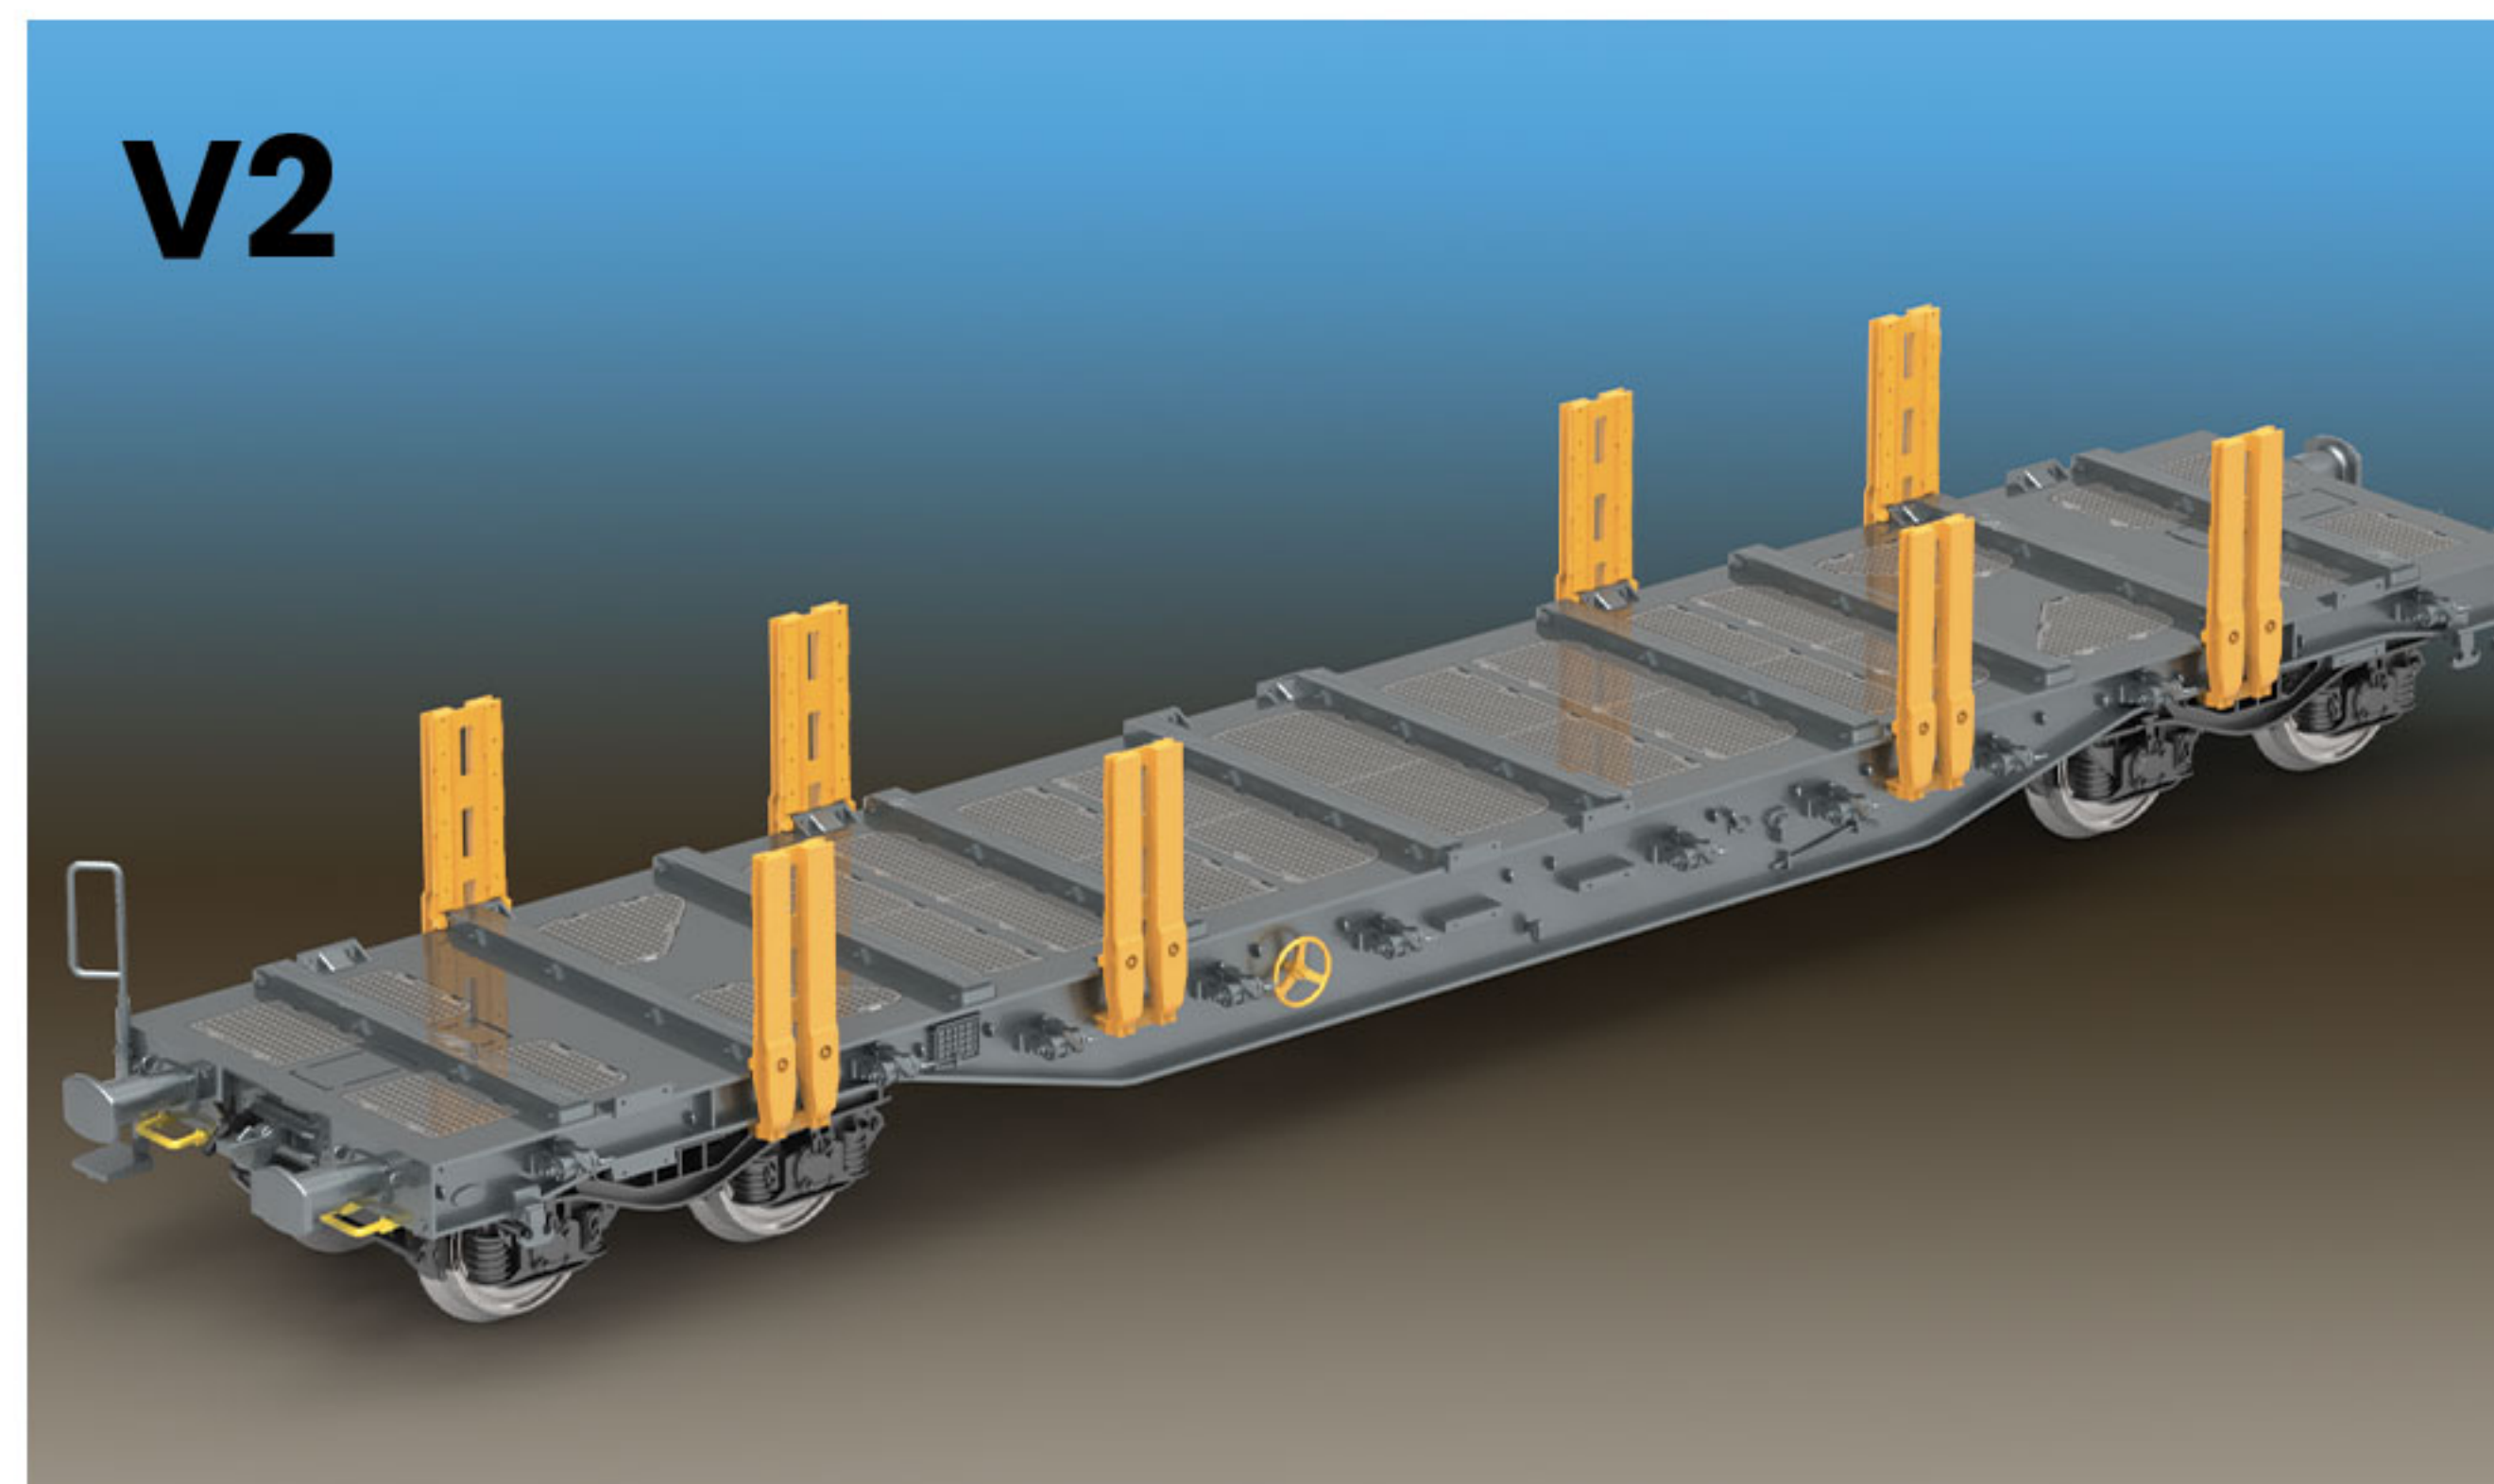

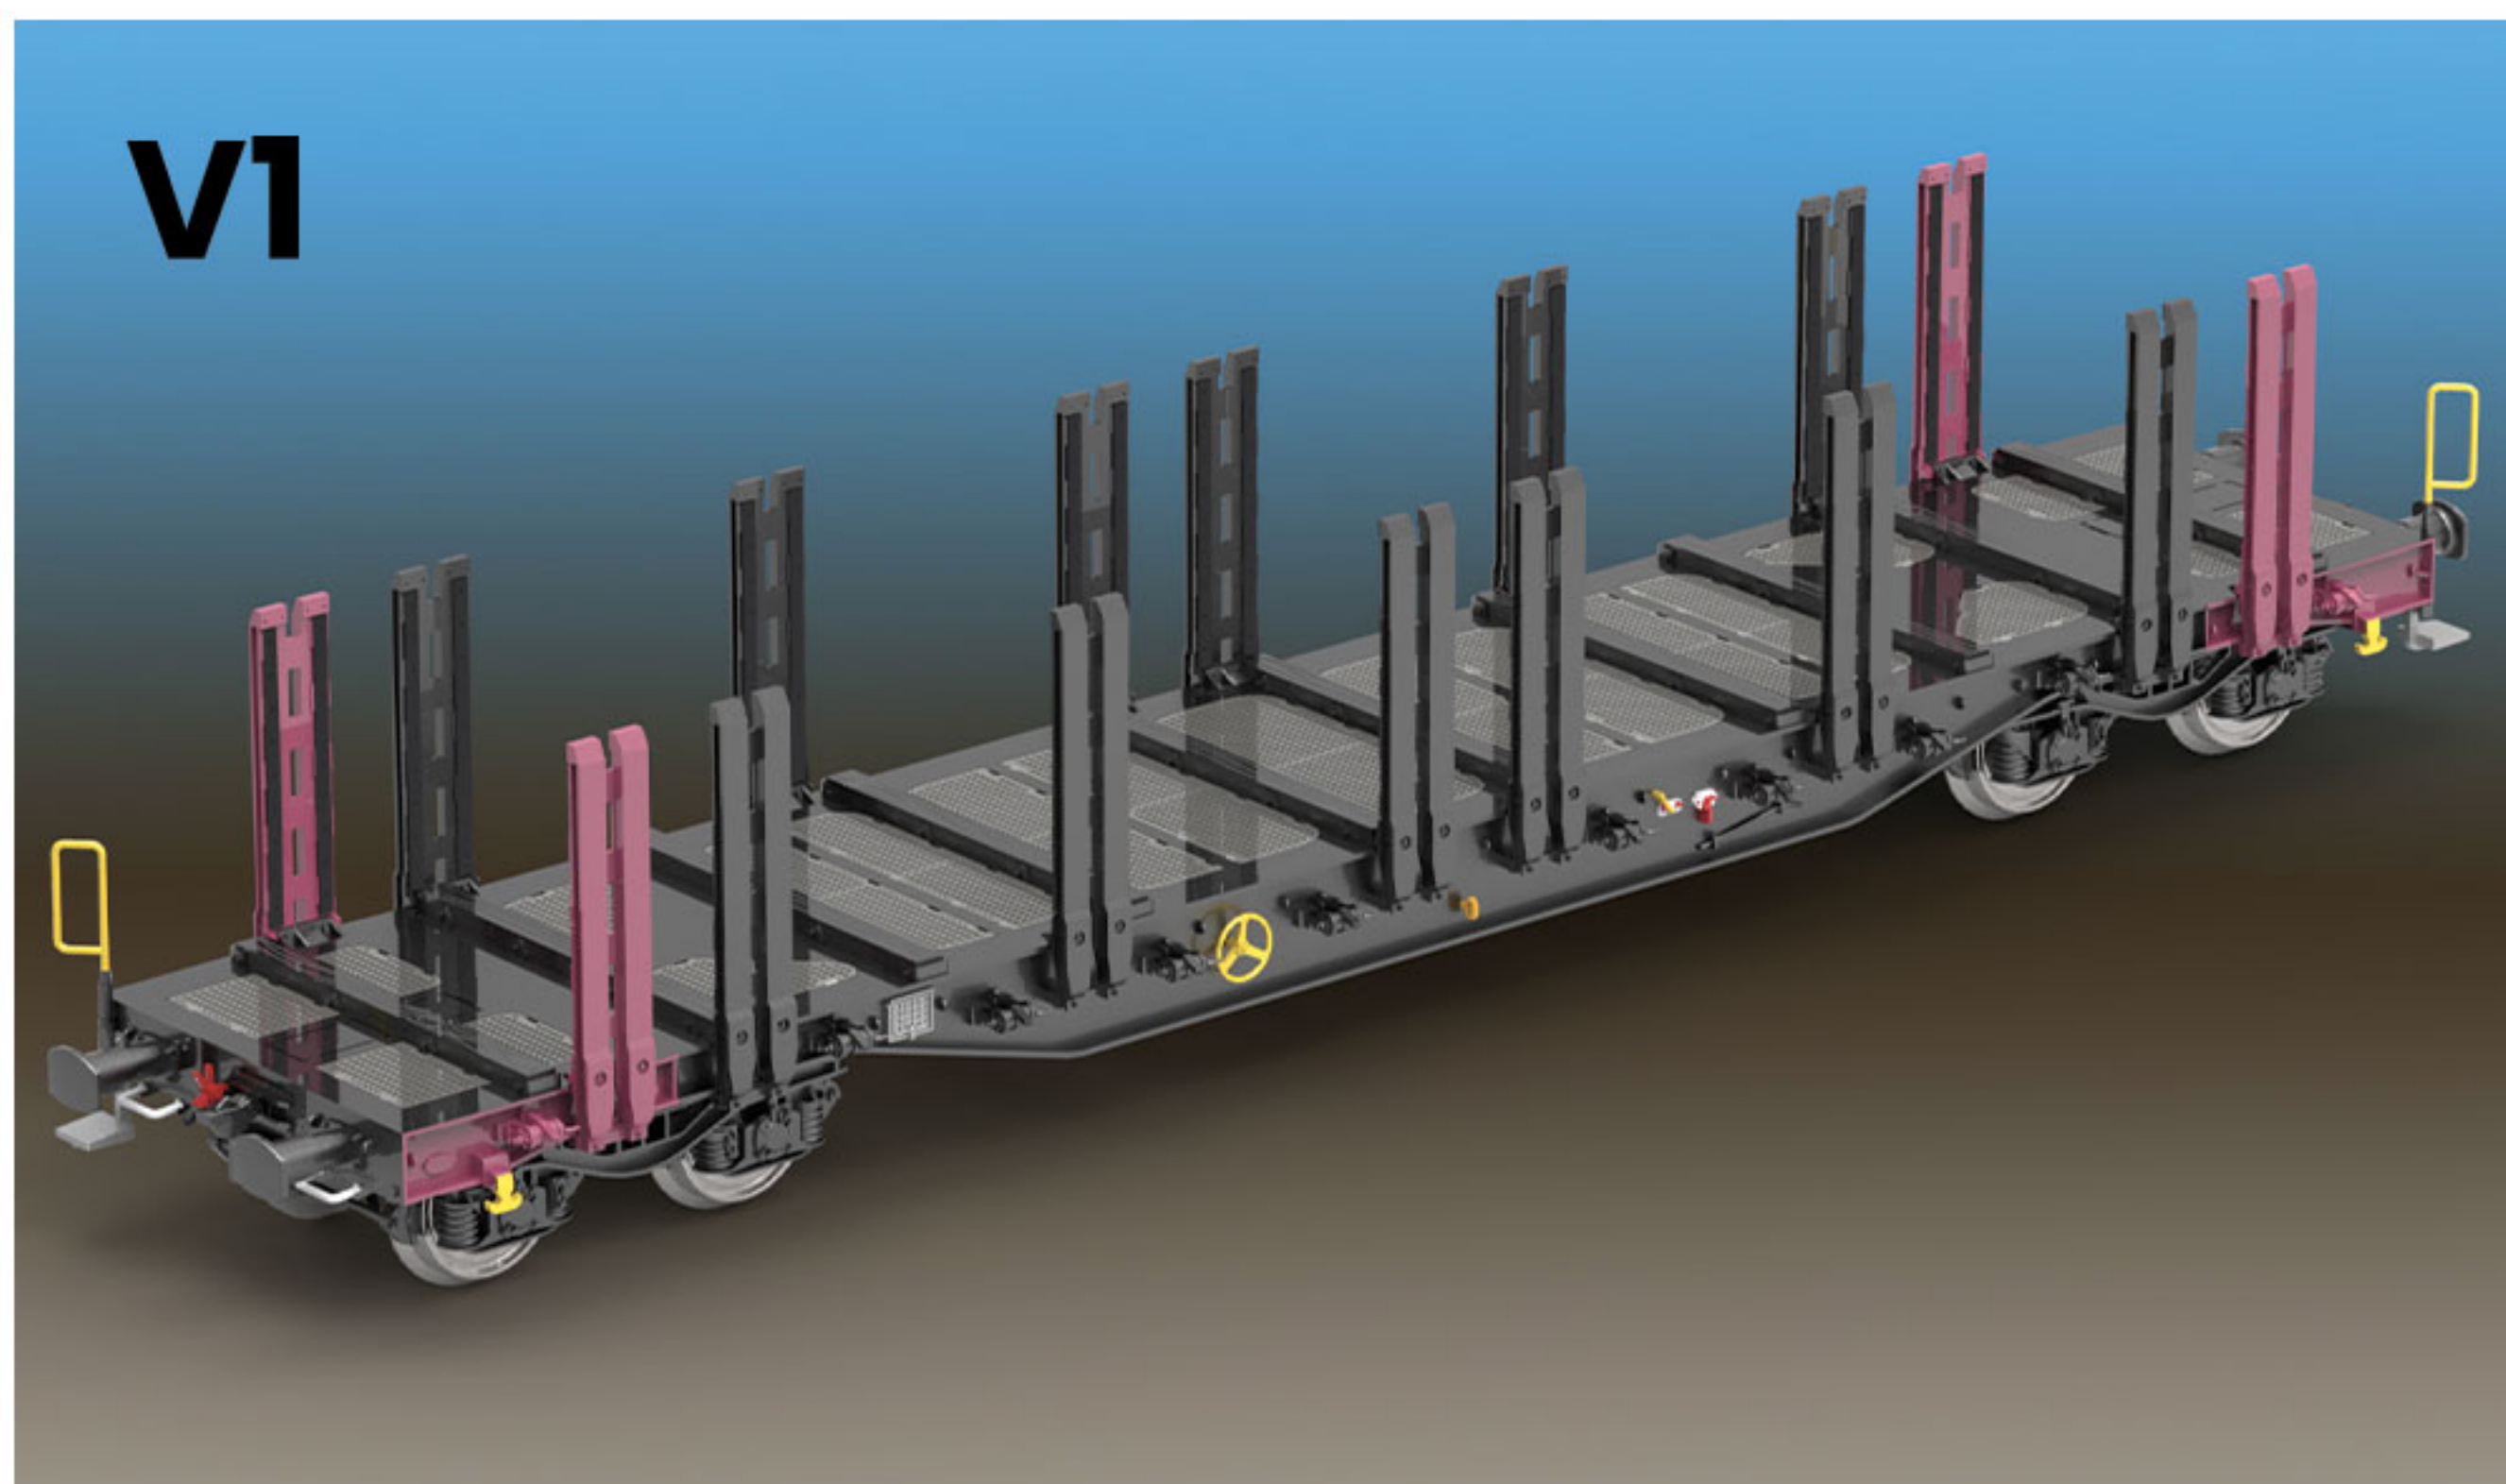

Novelty 2026

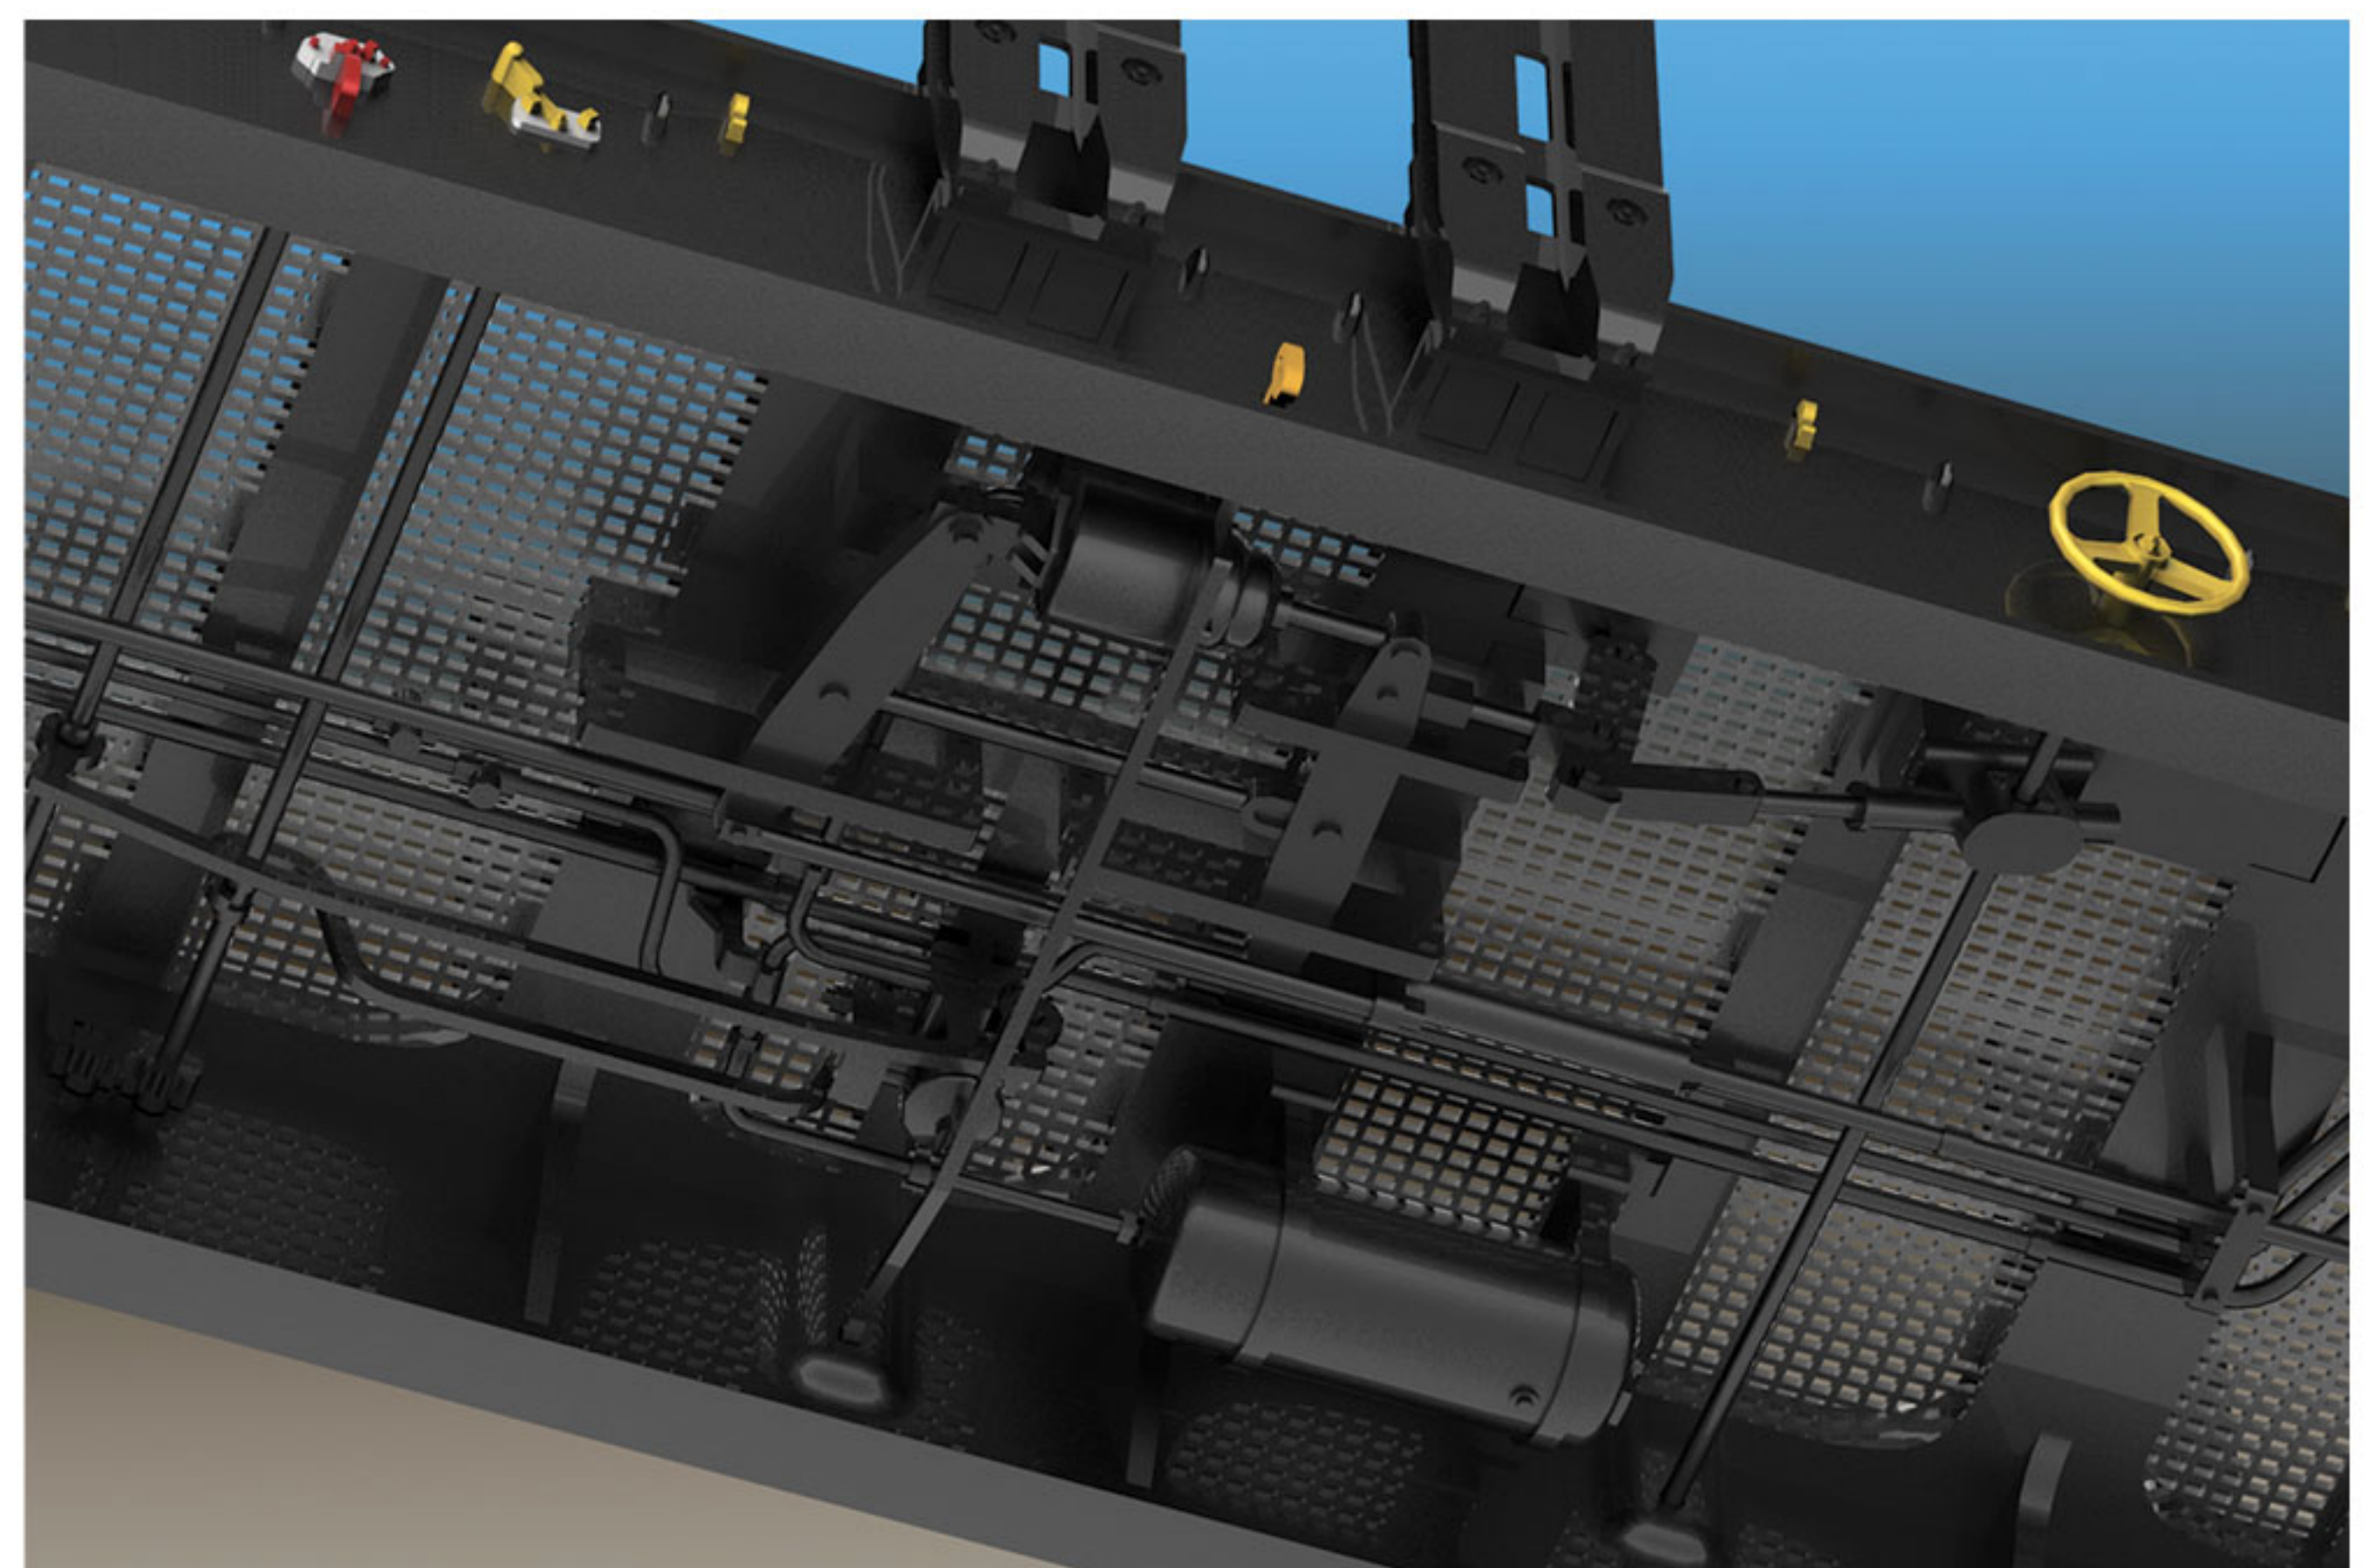

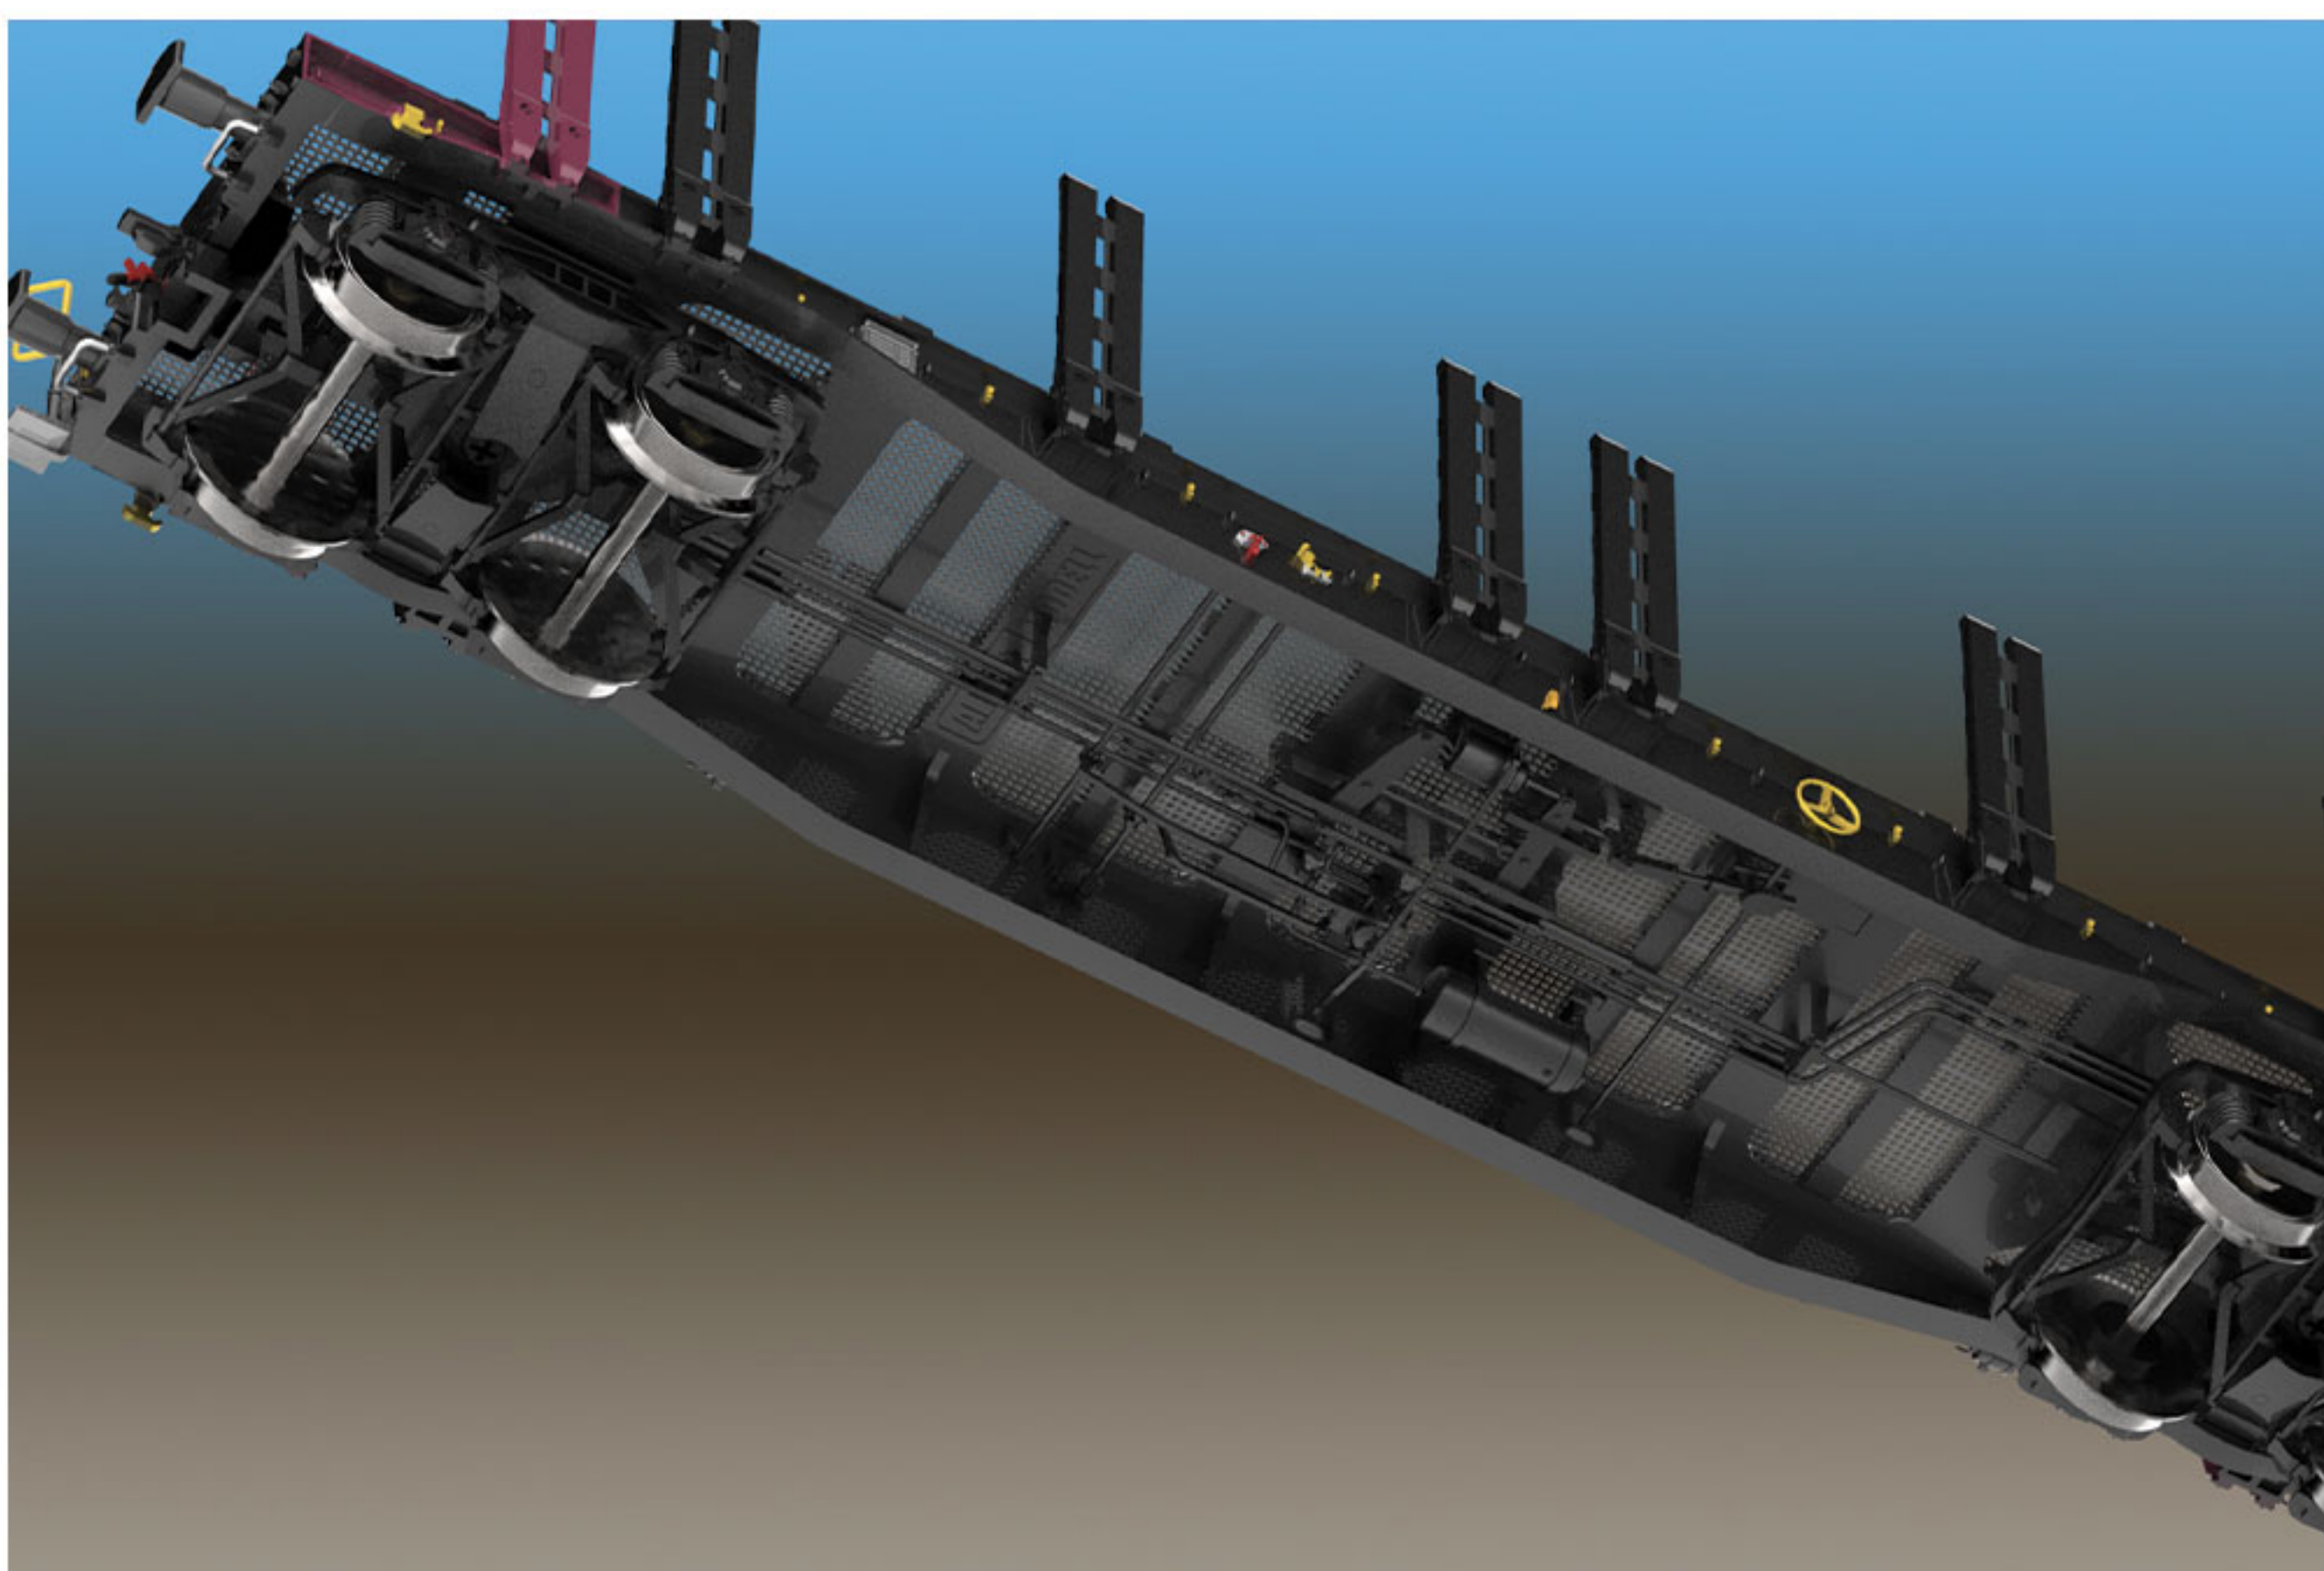

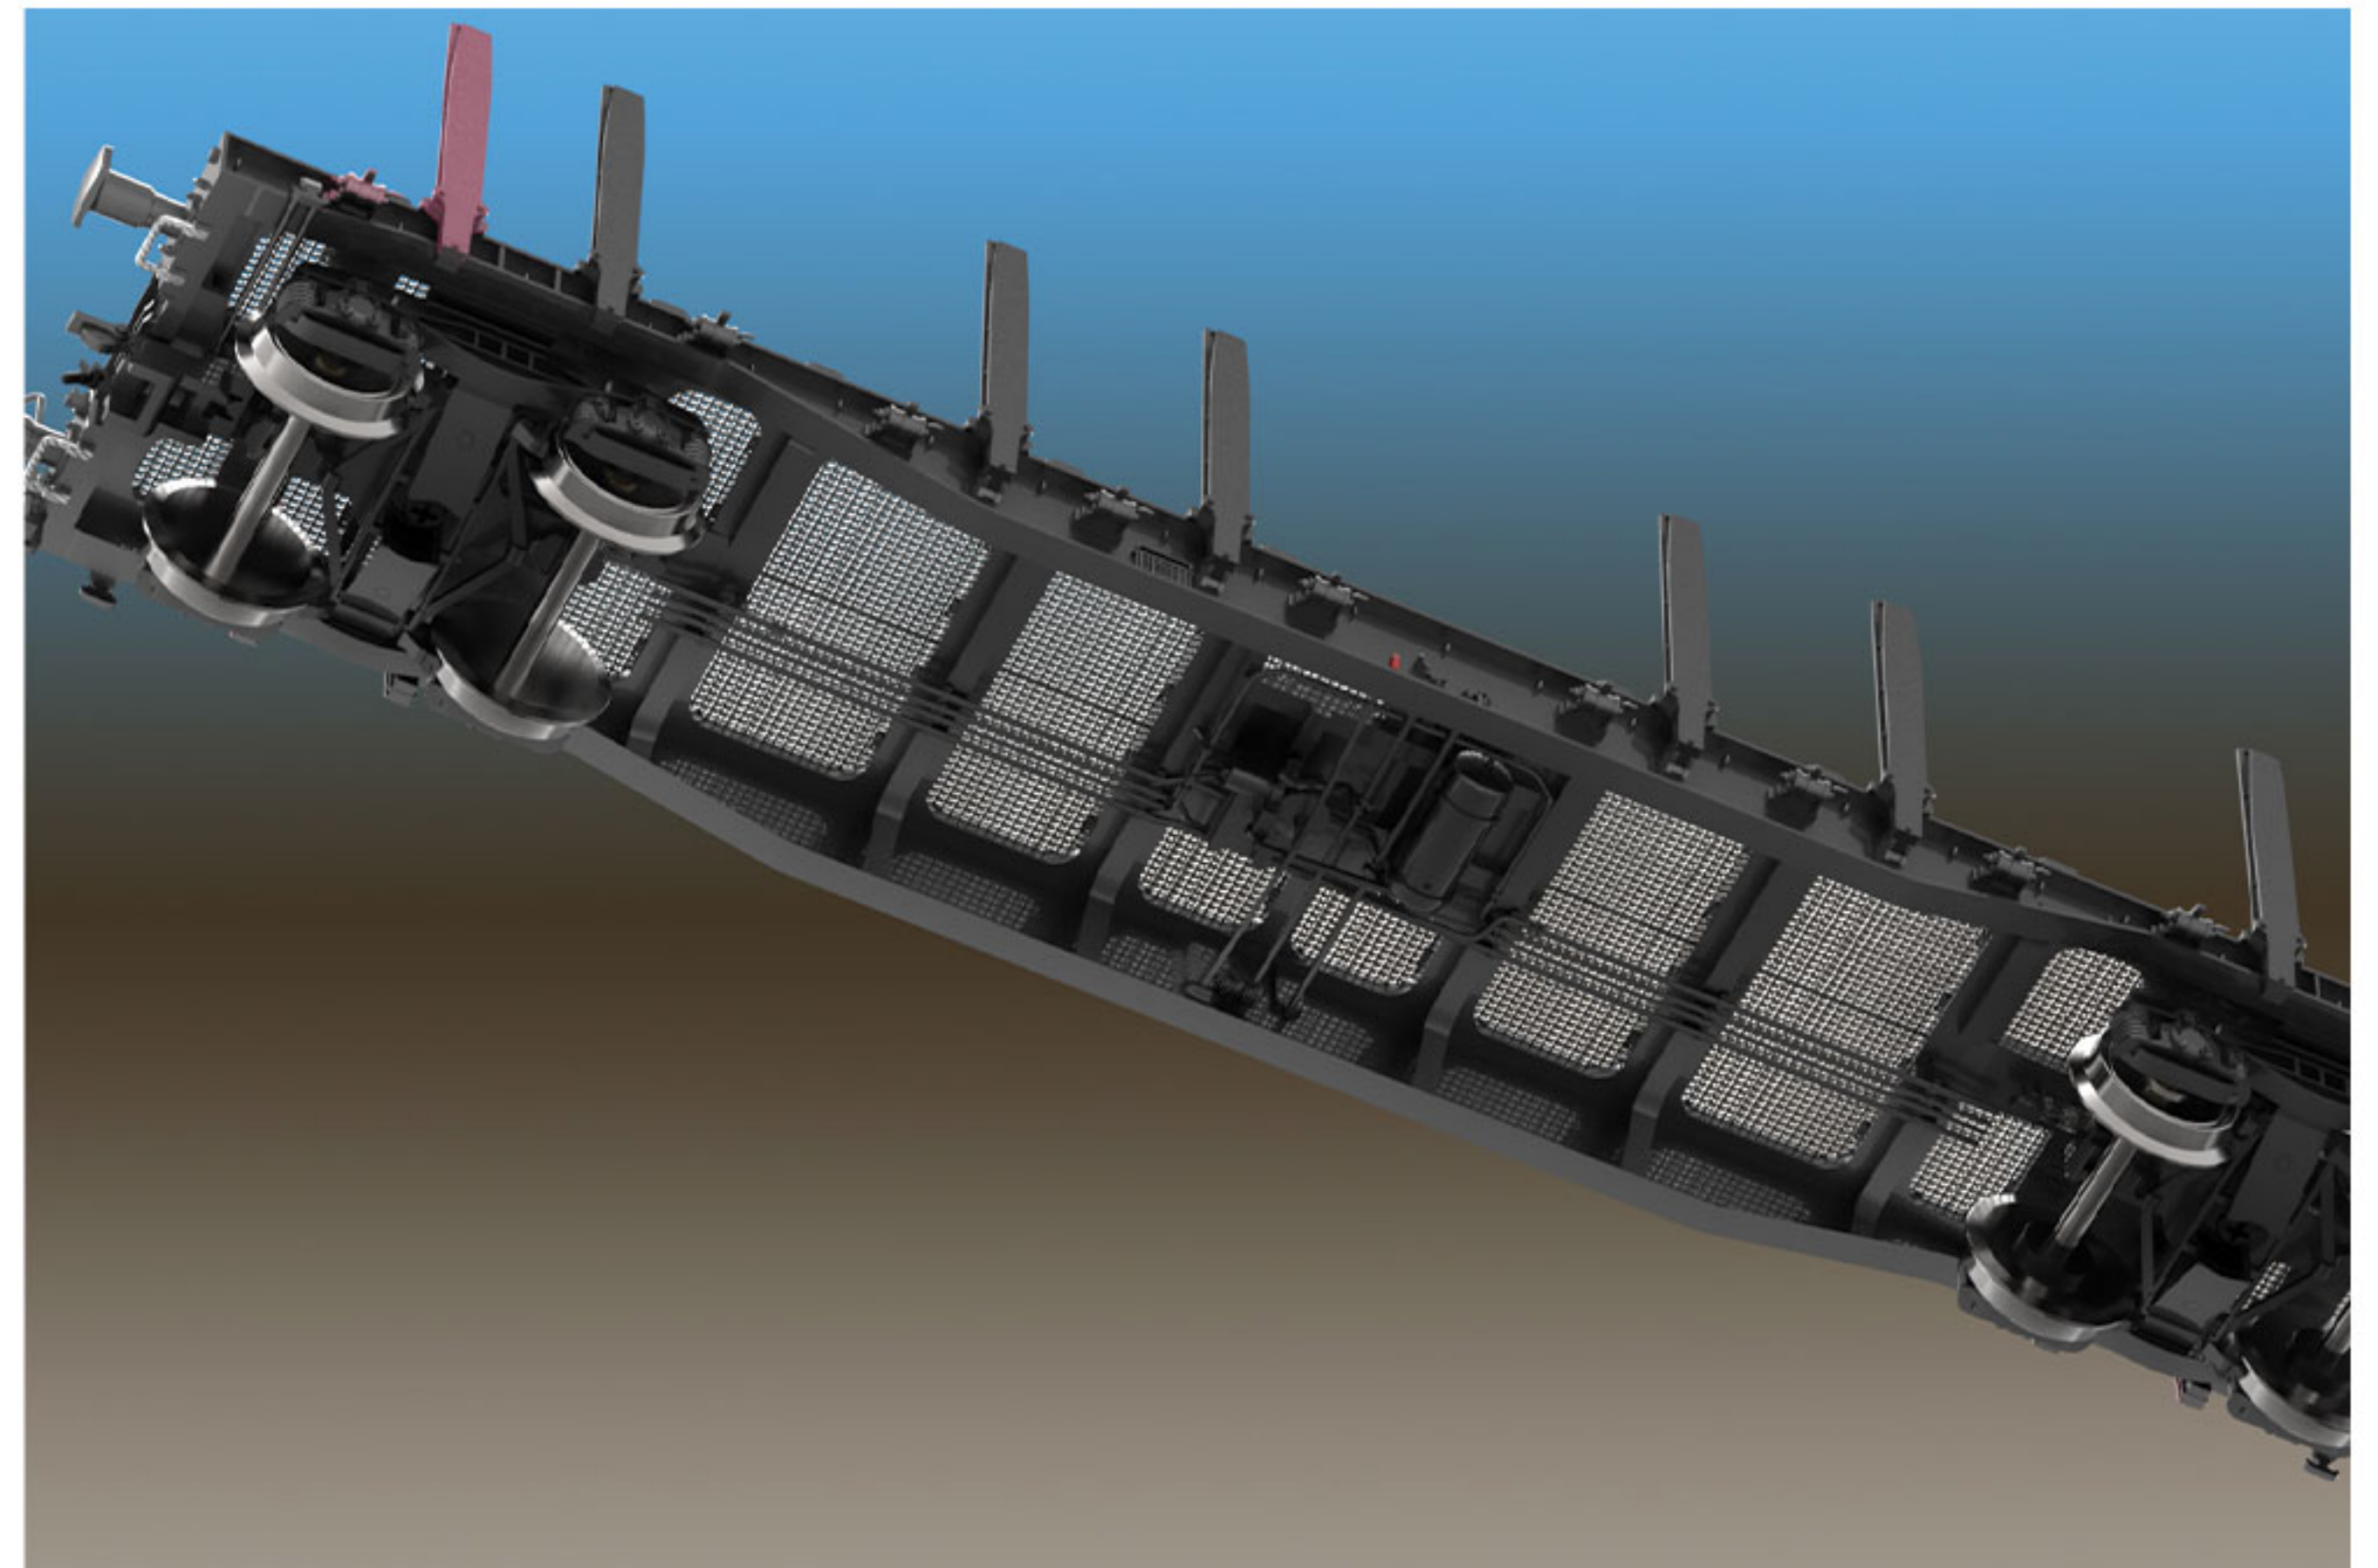

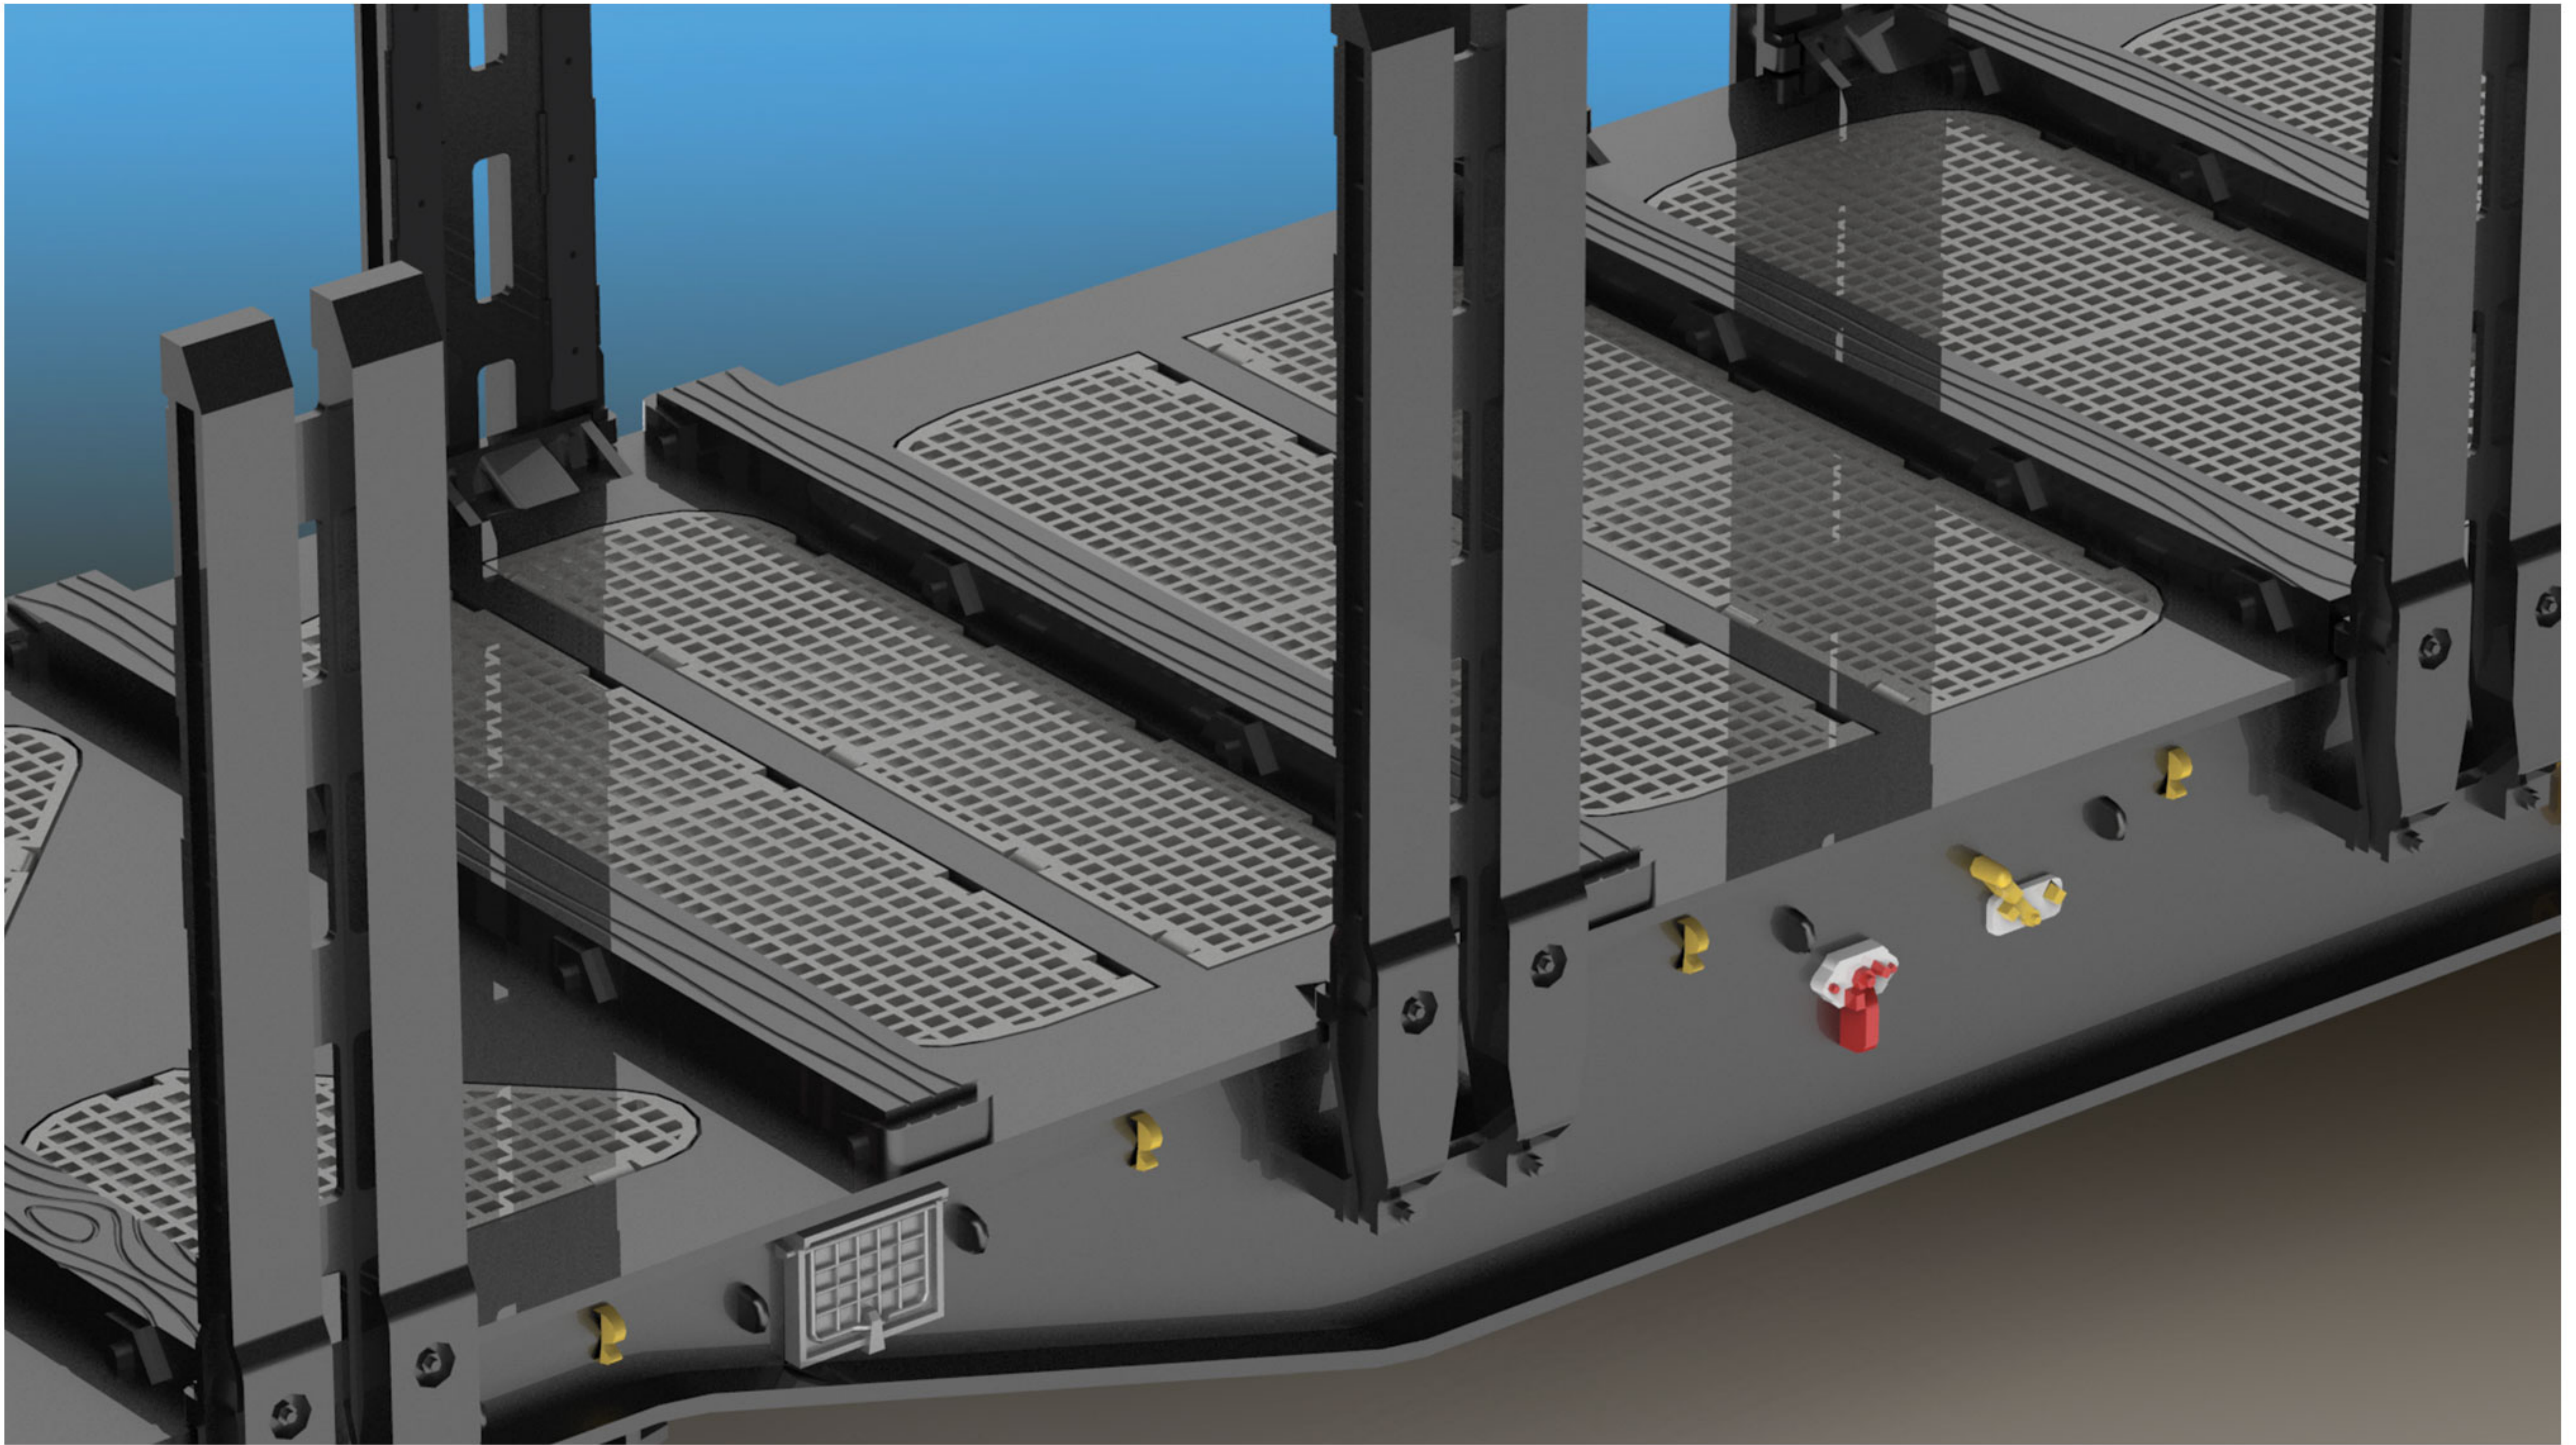

Smnps freight wagons

8 versions will be produced

The model will consist of about 105 to 128 parts

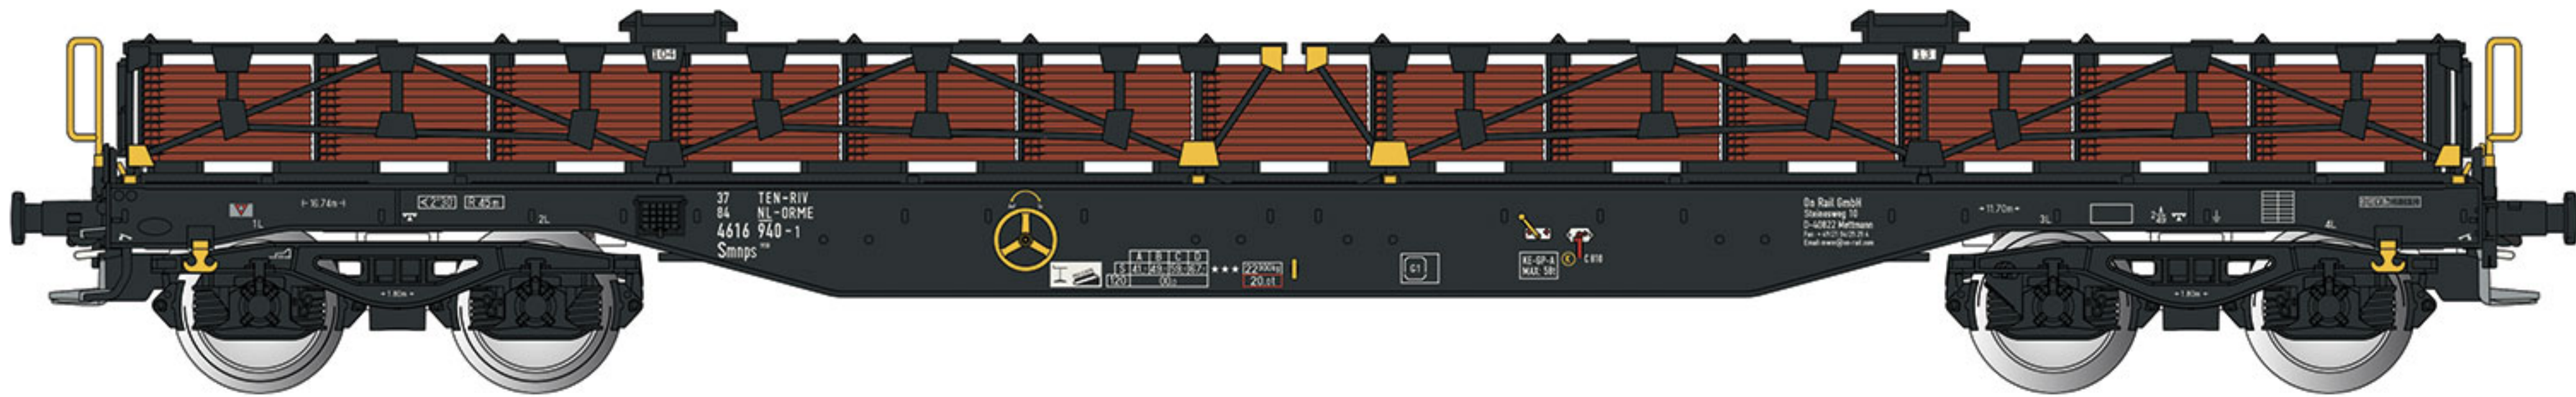

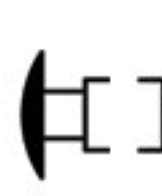

NL-ORME – Smnps freight wagon w/ cargo

 Netherlands | Era: VI | Registration number : 37 84 4616 940-1

ALBERT MODELL

About us

The history of our company

Established in 2014, Albert-Modell has swiftly emerged as a known name in the world of model railway manufacturing. Our international presence, which commenced in 2017, marks a significant milestone in our journey. At Albert-Modell, our primary focus rests on producing exquisitely detailed models of Eastern European freight wagons, alongside an impressive range of diesel locomotives, but our range includes more and more models from countries like Germany and Switzerland.

Our philosophy is anchored in the belief that model-making is an art that demands precision, detail, and affordability. We strive to blend these elements, offering our clients high-quality, intricately designed models at a price that respects their passion and investment in this hobby.

Our products are crafted not merely as toys, but as collectibles, with a dedication to craftsmanship.

We pride ourselves on producing models in limited quantities, ensuring that each piece we create is not just a model but an elegant representation of the original. This approach underlines our commitment to quality over quantity, making our models sought-after items for collectors and enthusiasts who value exclusivity and authenticity.

We highlight your miniatures
